

User Manual

Product Name:

MOD INFOTAINMENT SYS

Model Name:

U718/CDC1006A

Technical parameters

The supply voltage range for Nominal mode is from 9V to 16V.

Operation Temperature

-40°C~75°C

Product description

U718/CDC1006 is a Wi-Fi /Bluetooth module. The module is equipment installed in a car to provide in-car entertainment and information for the vehicle occupants. User can listen to USB audio, BT audio by using the equipment.

Please read this manual thoroughly since the information in it may allow you to know how to operate your car safely and properly, and enjoy your driving at maximum.

The detailed use guide for this device could be found in car user manual too.

Operating Frequency Bands

BT: 2400-2483.5MHz

WIFI 2.4GHz: 2400-2483.5MHz

WIFI 5GHz : 5150-5250MHZ; 5725-5850MHz

Main Interface

- ① Status bar: It can display the status of information such as time, network signal, GPS signal, etc.
- ② Account login entrance: Enter to scan the code to log in to the account
- ③ Home page small card: Different applications can be set and projected onto the large screen.
- ④ Resident bar: integrates desktop, settings, ALL APPS lighting settings, air conditioning page entrance&air conditioning temperature&MAX, Baidu Maps, Suixin, Bluetooth phone application entrance.

Quick Control Panel

Pull down the status bar to enter the quick control interface

The functional areas include:

- ① Personalized profile
- ② Simplify the screen

- ③ Bluetooth switch
- ④ System settings
- ⑤ Brightness adjustment
- ⑥ Volume adjustment
- ⑦ Media Control Center
- ⑧ Message Center

FCC 15.105 Information to the user (Class B)

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC 15.21 Information to user

Please note that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF exposure statement

This equipment complies with radio frequency exposure limits set forth by the FCC for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20 cm between the device and the user or bystanders.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.
