4 Get started

Prepare the Remote Control

- Open the battery holder cover of the remote control. Install two AAA batteries. Make sure to match the polarity (+/-) .
- Put back the cover as indicated picture.
- The distance between the remote and the projector should not exceed 5 m /16.4 ft.

Note:Batteries not included.

Power On/Off

- Insert the power cord to the projector and plug it into power outlet.
- Press the power button or remote control power button once to power on.
- Press the power button or remote control power button twice to power off.

- Place the projector on a stable, flat surface in front of the projection screen.
- Please adjust the distance between the projector and the projection screen to get the desired projection image.

Projection Distance and Projection Image Size

Projection Image Size (inch)	Distance (m)	Distance (ft)
60	1.8	5.9
70	2.1	6.89
80	2.4	7.87
90	2.7	8.86
100	3.0	9.8
110	3.3	10.8
120	3.6	11.8

Tips: The projection image size refers to the distance of the diagonal of the image size instead of the length of the image size.

Focus Manual

Press Focus+ or Focus- on the remote control to manually adjust the focus. Please carefully observe the focus icon until get a clear image.

6 Screen mirroring

Wireless Screen Mirroring

1. Make sure your device and the projector are connecting with the same network.
2. Open Wireless Screen to enter the interface.

ANDROID DEVICE

1. Turn on the wireless projection function of your Android phone.
2. Search and connect the projector to start the screen mirroring.

IOS DEVICE

1. Turn on the Airplay of your iPhone/iPad
2. Search and choose the projector device name to share the screen.

Note: Due to HDCP copyright, the projector doesn't support cast Netflix or YouTube content from smartphones directly. To watch these channels you need a TV stick (Fire TV Stick, ROKU TV Stick, etc).

Wired Screen Mirroring

1. Open Wired Screen to enter the interface.
2. Connect your device to the projector through your mobile phone charging cable.

2. Connect the other end of the 3.5mm AUX cable to the AUX port on headphones or external speakers.
3. Playback on the projector.

VISULAPEX

visulapex@outlook.com

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
