USERS MANUAL

X3 Helmet Bluetooth Headset

Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction

Installation steps

● Fixed and installed by means of clips

Slightly open the metal clip and insert it directly into the helmet's inner edge.

Peel back the inner padding at the ear position of the helmet where there is space, and attach the

Properly align and attach the speaker to the main surface (start with the left speaker).

Position the touch band and padding in the appropriate location on the helmet, and adjust the microphone helmet, and adjust the microphone height (ensure proper adhesion and comfort).

Insert the plug into the headphone jack.

Installation complete.
