Timing function: automatic on/off with timing function

Smart scene

Equipment group

2. Registration and Login:

CozyLife APP download: Scan the QR code below or search for "CozyLife" (iOS version) or Google Play (Android version) in the APP Store, then register and log in after downloading.

3. Instructions For Use

For the first use, plug the smart socket into the power jack, and the indicator light will turn on successfully.

After the power is turned on, short press the power button to turn on/off; long press the power button for 3 seconds, the indicator light flashes, and the factory settings are restored.

- Indicator status description.

Light flashes: in the state of network distribution.

Steady light: successful connection.

4.Add Device 【Recommended to use 4.1】

4.1 Add Device WiFi

Step1: If you are using a WiFi product, confirm that the phone has turned connected to WiFi (only 2.4G WiFi network is supported), and at the same time confirm that the socket is in the factory mode;

Step 2: Open the "CozyLife" APP, the product will be automatically identified, and a prompt box will pop up at the "+" in the upper right corner;

Step 3 : Click the prompt box, select the device that needs to be connected, and click Next to enter the WiFi setting page;

Step 4: After entering the WiFi password, wait for the network configuration to be completed;

Step 5 : After successfully connecting, you can rename the product and classify the room.

4.2 Add Device AP Mode

Step 1 : network is supported), and at the same time confirm that the socket is in the factory mode;

Step 2 : Click the "+" in the upper right corner of the "Device" page to enter the "Add Device" interface, and click the "WiFi Device" column;

Step 3 : Confirm that the device enters the network configuration mode, click "Next" to enter the WiFi setting page;

Step 4 : After entering the WiFi password, click "Next" and find the WiFi hotspot starting with "CozyLife_" on the phone's "WiFi" setting page according to the prompts on the page, and click to connect;

Step5: After connecting to the designated hotspot, return to "CozyLife APP" and click "Next" and wait for the network

configuration to be completed;

Step6: After successful connection, you can rename the product and classify the room.

5.Important Note

- The applicable working temperature of this product is 0°C ~40C, please do not use this product in an environment where the temperature is too high or too low.
- This product is a precision electronic product. Please do not use this product in an environment that is excessively humid or may cause water to enter the product, so as not to affect normal use.

- Please make sure that this product is installed within the range of Wi-Fi signal coverage, and placed as much as possible in a location with better Wi-Fi signal. Try to install it as far away as possible from metals and microwave ovens that may affect the signal.

Warning: This product is not suitable for use in places with high humidity such as bathrooms. Our company is not responsible for product use problems and safety issues arising therefrom.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, Human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.
