# Fragrance System Introduction

Project Name: NT3.0-FCM

Production Name: Fragrance Module

---

Your car provides an in car fragrance system for you and your family, allowing you to choose your preferred fragrance and enjoy a fresh and comfortable taste while driving.

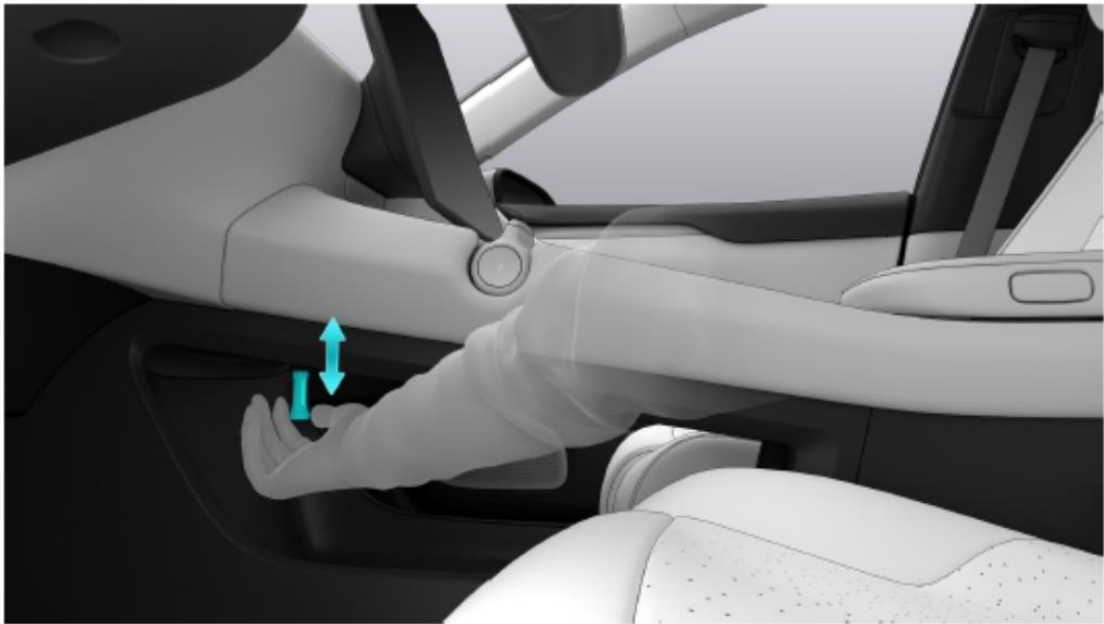

We provide you with a variety of fragrances, from which you can choose your preferred fragrance and install it in the fragrance module above the open storage area in the vehicle center console. You can also change the fragrance bottle according to your personal preference.

The installation and replacement methods for fragrance bottles are as follows:

1. Open the cap of the fragrance bottle, insert the thinner end of the fragrance bottle upwards into the inner hole of the fragrance mechanism above the central open storage area, gently press the bottom of the bottle upwards to ensure proper installation.

## ATTENTION

Do not rotate the fragrance bottle during installation.

2. After inserting the fragrance bottle into the hole, it can be attracted in place by the magnet inside the fragrance mechanism.

3. After the fragrance bottle is installed in place, the central control screen will prompt that the fragrance installation is successful and display the fragrance information corresponding to the current hole.

4. When replacing the fragrance bottle, you need to pinch the bottom of the fragrance bottle tightly with your fingers and slowly remove the fragrance bottle from the fragrance mechanism.

After the successful installation of the fragrance, the fragrance type will be identified according to the information of the chip in the fragrance bottle, which can be read by NFC function of the fragrance module. You can enter the air conditioning

---

settings page on the central control screen, click on fragrance, and on this page, you can see the fragrance type of the installed fragrance bottles. Also, you can control the ON/OFF of the fragrance system, adjust the concentration of the corresponding fragrance, and select fragrances with different installed flavors

## **WARNING**

- Please store fragrance bottles out of reach of children to prevent them from ingesting and endangering their health.
- Do not allow children to insert their fingers into the fragrance mechanism above the central open storage area to avoid accidents.
- Please do not install or replace fragrance bottles while driving, and pay attention to your driving safety.
- If you experience any physical discomfort while using the fragrance, please stop using it immediately.

## **ATTENTION**

- Please pay attention to the shelf life of the fragrance before installing the fragrance bottle. The fragrance has a shelf life of 1 year when the packaging is unopened; After unpacking, the fragrance has a shelf life of 3 months. Please use the fragrance within its shelf life and replace it with a fragrance that has expired.
- Some fragrances (such as 'wilderness') have a refreshing effect, please use them when necessary.
- When replacing fragrance bottles, please keep your hands clean to ensure the normal operation of the fragrance system.
- There are magnets in the fragrance mechanism. Do not place electronic devices such as mobile phones or tablet PC near the fragrance hole above the open storage area of the central control to avoid affecting the functionality of electronic devices and fragrance modules.
- Spices may undergo chemical reactions with organic matter. Please avoid direct contact between the ceramic fragrance core in the fragrance bottle and plastic parts.

## **EXPLANATION**

- The fragrance experience may vary depending on the temperature inside the car, air conditioning volume, and individual physiological state.
- Please install ceramic fragrance cores from official channels to avoid damaging the fragrance bottle and ensure the quality of the fragrance.
- After installing the fragrance bottle, if the fragrance is not successfully recognized, please reinstall it.

## **FCC Caution**

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
