## RF INSTRUCTIONS – PC and Mac

### Keyboard

1. Turn the keyboard on.
2. Plug the dongle into your computer.
3. To change to 2.4G mode, hold the Fn key. While holding it press 2.4G button and let go of both to see the red LED flash once.
4. You are connected.

#### **NOTE**

*If you are doing this on a Mac. Please do the keyboard assistance. Please look at the steps under the Keyboard Setup Assistance section.*

### Mouse

1. Turn the mouse on. The RF receiver should be in the computer at this stage.
2. Press the mode changer button until you see a red-light flash in between the DPI button and the scroll wheel.
3. It is now connected and ready to use.

#### **NOTE**

*When you are on a Mac, and the Keyboard Setup assistance pop up for the mouse. Please close the window since it is not needed.*

# RESYNCING INSTRUCTIONS – PC and Mac

The following steps can be used in the event that you received a replacement dongle or if the keyboard or mouse was not synced prior to you receiving them.

## Keyboard

1. Press and hold the Fn + 2.4G on the keyboard until the red LED starts blinking rapidly.
2. Plug the dongle/receiver into your device when the LED begins flashing.
3. Once resynced the red LED will go off.

## Mouse

1. Turn on the power switch
2. Press the mode changer button until the 2.4G light starts blinking.
3. Press and hold the mode changer button for 5 seconds until the charging/channel indicator light flashes rapidly.
4. Plug the dongle/receiver into your device when the LED begins flashing.
5. Once resynced the red LED will go off.

# BT WIRELESS INSTRUCTIONS – PC

## **Warranty**

*X9 Performance warrants that this product will be free from defects in title, materials and manufacturing workmanship for one year in North America from the date of the purchase. If the product is found to be defective then, as your sole remedy and as the manufacturer's only obligation, X9 Performance will repair or replace the product. This warranty is exclusive and is limited to the product that this user's guide came with. This warranty shall not apply to products that have been subjected to abuse, misuse, abnormal electrical or environmental conditions, or any condition other than what can be considered normal use. The liability of X9 Performance arising from this warranty and sale shall be limited to a refund of the purchase price. In no event shall X9 Performance be liable for costs of procurement of substitute products or services, or for any lost profits, or for any consequential, incidental, direct or indirect damages, however caused and on any theory of liability, arising from this warranty and sale. These limitations shall apply notwithstanding any failure of essential purpose of any limited remedy.*

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
