Smart Lock

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance
could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and,
if not installed and used in accordance with the instructions,
may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.If this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on, the user is encouraged to try to
correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different
from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines,
This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna

▌ Customer Q&A

What type of battery does it use?

It uses 2 pcs AA **alkaline batteries**.
Generally, 2pcs AA alkaline batteries can provide 12 months of power.

How many users can I add?

Owner : only one (the first person who scan qr code and bind the lock)
Member : no limited
Guest : no limited

How many passwords can be set?

Dynamic password change each minute .no limited .
Static password /period password ,total of 20 pcs passwords can be set.

If users (employees) no longer work in the company, can we delete them?

Yes , the owner (member who have the permission) can delete
them from the member list/guess list.

Can we check the use records?
The owner (member who have the permission) can check the records . Records include bluetooth unlock records , set password records , get dynamic records . Each record has user name ,time ,action.

Can it be installed outdoors or only indoors?
Will rain affect its performance?
The waterproof grade is IP44. There is no problem with daily splashing, but you can't leave it outside in the rain. If you have to install it in a place where it may rain, you need to use something to cover it.

How to set a fixed password? The application always prompts "failed to connect the device".
1、Set static password need use phone bluetooth . So your phone needs to turn on Bluetooth (Some android phone need turn on GPS) . And it should be close to the lock in about 5 meters;

2、If you still cannot connect, you can try reset the device, by reinstall the battery .

How to remote unlock?
There are the following ways to remote unlock:
1、OTP: You can [Click for OTP] to get the OTP code, then send the code via SMS/WhatsApp to somebody who near the lock to unlock;

2、Share App: You can ask your peopel to install WeHere App on his phone and regist account, then you add his account into Member/ Guess list to share lock,then he can unlock;

3、Via W100: If you buy our W100(Wifi-Bluetooth bridge), then you can via wifi to remote unlock directly; also You can via W100 to Set/ delete period password/static password remotely;
