

CH-03 Car Wireless Charging Stand Manual

Input voltage: DC 5V/9V

Input interface: TYPE-C

Output power: 15W

Inductive charging distance: 1-8 mm

Working frequency: 112-205KHz

Supports fast charging protocols: PD, QC2.0, QC3.0

LED light: powered on blue light on, working green light on

1. Preparation stage:

- Ensure that your device supports wireless charging function. The wireless charging function can usually be found in the device manual or product specifications. If the device does not support wireless charging, you will need to purchase an adapter.

one

- Check if the wireless charger is properly connected to the power source and if the power plug is securely plugged into the socket.

- Ensure that the surface of the wireless charger is clean, free of dust and debris to ensure charging efficiency.

2. Charging stage:

2.1 Attach the mobile phone that supports wireless charging to the circular charging area of the wireless charger.

2.2 The device will automatically start charging without any additional operation. You can see the charging icon on the device screen

2.3 During the charging process, please ensure that there are no objects blocking between the device and the charger to ensure charging efficiency.

3. End charging:

3.1 When the device is fully charged, the wireless charger usually automatically stops charging. You can see the charging completion icon on the device screen.

3.2 Remove the device from the wireless charger. At this point, the device is fully charged and can be used normally.

4. Precautions:

4.1 Do not move the device during the charging process to avoid interrupting the charging.

4.2. Do not use the device during the charging process to avoid damage to the device or charger.

4.3 If the wireless charger overheats, please stop using it immediately and contact after-sales service.

Warning:

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there

is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help
This equipment must be installed and operated with a minimum distance of 20 cm between the radiator and user body.
