Wireless Earphone User Manual

Button function

1. Power on: Press and hold the button for 3 seconds to turn on the device, or remove the earphones from the charging case. The earphones will automatically turn on the power.

2. Power off: Press and hold the button for 5 seconds, or place it in the charging compartment to automatically shut down.

3. Play/Pause: Click one of the earphone buttons to pause playback during playback, and click to replay during pause.

4. Answer/hang up the phone: Click one of the earphone buttons to answer a call, or click one of the earphone buttons to end the call and hang up.

5. Reject the call: Press and hold the earphone button for 2-3 seconds during incoming calls to reject the call.

6. Previous song: Double click the main ear button.

7. Next song: Double click the secondary ear button.

8. Volume up: Three clicks on the main ear button.

9. Volume down: Three clicks on the secondary ear button.

10. Wake up Siri: Long press the button for 2 seconds while connected to the phone.

11. Change language: Double click the button when Bluetooth is not connected.

Pairing link

1. Remove the earphones from the charging case, and the earphones will automatically turn on the power and pair. When the indicator light of one earphone flashes red and blue, and the other earphone turns off, it indicates that the earphone has been successfully paired. Open the Bluetooth function on your phone and search for and click connect.

2. Without a charging case, press and hold the multifunction buttons on both earphones for 3 seconds. When you hear the "power on" prompt sound and the machine indicator light flashes red and blue, it indicates that the earphones have been turned on. After both earphones are turned on, they will automatically pair. If one earphone indicator light goes out, it means that the two earphones have been successfully paired. Turn on the Bluetooth function on your phone, search and click to connect.

3. After the earphones are paired for the first time, they will automatically pair and connect to devices that have already been connected when turned on in the future.

Charging indicator light description

1. Earphone indicator light: 1) When charging, the red light of the earphones is always on; 2) After fully charged, the indicator light will turn off (or the charging compartment display screen will show 100).

2. Charging case indicator light: 1) When charging the charging case, the indicator light flashes; 2) After the charging case is fully charged: the indicator light stays on (or the charging compartment display screen shows 100); 3) When charging the earphones with the charging case: the indicator light flashes.

Attention: Please use a 1A output charging head and do not use a fast charging head to avoid battery damage.

Product specifications

Music duration: 2-3 hours

Talk time: 3-4 hours

Standby time: 10-12 hours

Bluetooth protocol: A2DP/HFP/HSP/AVRCP

Transmission distance: 10-15 meters

Earphone charging time: 1-2 hours

Note: Product parameters may vary due to factors such as model, usage, and environment.

Precautions for use

1. Earphones should be stored in a dry environment to avoid contact with oil, water vapor, swallows, moisture, and birthday celebrations, in order to avoid affecting product performance.

2. Avoid using stimulating organic solvents or items containing these ingredients to clean earphones.

3. Earphones need to be used correctly and in a standardized manner according to requirements, and attention should be paid to the impact of the usage environment on ear cleaning. To ensure smooth connection, it is recommended that the distance between the phone and the earphones be within 10 meters.

4. If there are other problems such as difficulty connecting or poor communication with the earphones, please do not disassemble the earphone body and its accessories without authorization.

5. Please use a charger that meets the requirements for charging.

To ensure your normal use of the earphones, please ensure that the earphones have sufficient battery.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed

and used in accordance with the instructions, may cause harmful interference to radio

communications. However, there is no guarantee that interference will not occur in a

particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged

to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the

receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device

can be used in portable exposure condition without restriction
