

Information to User

Note: This device has been tested and found to comply with the limits for Class B digital devices, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Caution: Changes or modifications not expressly approved by the responsible party may void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept harmful interference, including interference from authorized radio frequency sources.

The device has been tested to meet general FCC RF exposure requirements.

- ⑥ Microphone Type-c charging port
- ⑦ Microphone clip
- ⑧ Switch key
- ⑨ part to connect phone
- ⑩ Right indicator light
- ⑪ Left indicator light
- ⑫ part of receiver

How to use

Step 1: Connect the receiver to phone with port.

Note: Some Android Phones / Smart mobile phones can be used normally *only* when they go to the settings [search "OTG" - turn on OTG power supply]

Step 2: Press and hold the power on button of the microphone, and the indicator light will turn on green, indicating successful startup.

Step 3: The indicator light for the connection between the receiver and transmitter remains on, and the phone can use the microphone to listen by opening apps such as camera or streaming videos.

Special Note:
For the use of port there is no battery in receiver, and no need to recharge during live. If the phone is low power during live, it can be recharged directly through port.
