Board View 3**

**EUT Housing and
Board View 4**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'View 1'. The board is irregularly shaped with a central circular cutout. It features various electronic components including a small black integrated circuit (IC), several resistors, and a white circular component. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100mm wide and 60mm high.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'View 2'. This view shows the underside of the board. It features a large gold-colored connector on the left, a smaller gold-colored connector on the right, and a black multi-pin connector at the bottom. The board is placed on the same blue textured surface next to the same black ruler. The ruler indicates the component is approximately 100mm wide and 60mm high.

Solder Board-Component View 7	 A photograph of a small, square electronic component (likely a microcontroller or sensor) mounted on a blue printed circuit board (PCB). The component is positioned in the center of the frame. To the left of the component is a black L-shaped ruler with white markings. The vertical ruler shows measurements from 0 to 100 mm, and the horizontal ruler shows measurements from 0 to 100 mm. The component is placed on a light blue, textured surface.
Solder Board-Component View 8	 A photograph of the same electronic component as in View 7, but from a different angle. The component is still mounted on the blue PCB. The black L-shaped ruler is visible on the left, with the vertical ruler showing measurements from 0 to 100 mm and the horizontal ruler showing measurements from 0 to 100 mm. The component is placed on a light blue, textured surface.

Solder Board-Component View 9	 A photograph of a small, square, green printed circuit board (PCB) component. The component is populated with various electronic components, including a central microcontroller, several resistors, and capacitors. It has a gold-plated edge connector. The component is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The ruler shows the component is approximately 15mm wide and 10mm high.
Solder Board-Component View 10	 A photograph of the same green PCB component from a different angle, showing the underside. It features a gold-plated edge connector and various surface components. The component is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The ruler shows the component is approximately 15mm wide and 10mm high.
