### 8.2 Uninstallation

Uninstall the application
1. On the home screen, tap Settings bitmap.
2. Tap Applications to list all the applications installed on the system.
3. Tap the APK you want to uninstall and tap Uninstall.
4. Tap OK to complete the installation.

# 9 Troubleshooting

### 1. Tablet first boot slow

After the Tablet system upgrade, the first time you need to install the pre-install applications, the time is about 2-3 minutes, after the boot will be faster.

### 2. Tablet can not connect to WIFI

Ensure that the wireless router providing network services is working properly.Make sure the distance between the Tablet and the wireless router is kept at a certain, and there is no wall or other obstacle separating them.Make sure the user name and password are entered correctly.

### 3. The Tablet is hot to the touch

The Tablet may get warm when using multiple applications at once, or when the screen is turned on to its brightest and is charging. This is a normal situation.

### 4. Unable to set up email or register applications

Make sure your internet connection is working properly and you can connect to the internet.
Make sure the email setup method is correct.
Make sure your system time is consistent with the local time.

**5. System anomaly does not work properly**

When you are installing some third-party applications, it may cause the system not to function properly. You can reset the system by pressing the reset button (next to the power connector).

**6. Web page cannot be opened**

Please keep the distance between the route and Tablet within the effective distance
Please restart WIFI and try again

**7. Tablet sometimes runs slowly**

This is a normal phenomenon. Please end some temporarily unused applications in the advanced task management and uninstall some third-party applications to free up more system resources.

# 10 How to reset your tablet

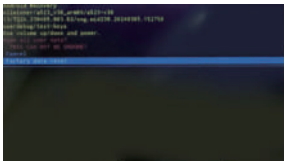

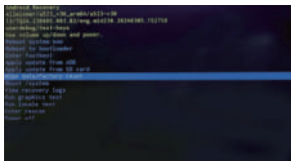

With the tablet turned off, long press the power button and volume up button to enter into the BIOS system.
Volume down key to move the cursor to "Wipe data/factory reset", click the power button to confirm the entry.
Select "Factory data reset", press the power button to confirm the selection of the tablet's factory data reset.
Dear Customer,
Thank you so much for purchase our Tablet, if you have any questions you can contact our Customer Service.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
