SAFETY INSTRUCTIONS AND WARRANTY

pre-installed

If any parts are missing or damaged, compare all parts with those listed in the package contents section. Do not install or use this lamp. Contact customer service.

Warning: Danger of electric shock

- Turn off the power on the fuse or circuit breaker box before connecting the wiring fixture to power.
- After the mirror turns on the light for 1 hour, the system will turn on the circuit protection and automatically turn off the light, which can be turned on again by the touch screen switch
- Turn off the power for any maintenance.
- Check whether the power supply voltage is correct by referring to the label information of the lamp.
- Electrical and grounding connections are made in accordance with the national Electrical code and any applicable local code requirements.
- All wiring connections shall be UL certified wire connectors.

Caution: Danger of injury

- Gloves and safety glasses should be worn when removing, installing, repairing or maintaining the luminaire from the carton.
- Avoid direct eye contact with light source when powering on.
- Consider small parts and destroy packaging materials as these can be harmful to children. The mirror is very heavy. Let the rescuers pick it up. Two people performing this installation is the easiest.

Warning: Risk of burn

- Allow clamp to cool before handling. Do not touch the shell or light source.
- Follow all lamps manufacturer's warnings, recommendations and restrictions, including drive type, lighting location, installation location method, replacement and recycling.

Product warranty

Product warranty from the date of purchase, manufacturer warranty for one year. If you have any questions, please feel free to contact us. We'll give you a satisfactory solution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
