

Transparent Magnetic Wireless Charging Holder

User Manual

Parameters

Materials: Tempered glass+Aluminium alloy.
Input: 5V/2A or 9V/2A.
Output: 5W/7.5W/10W/15W.
Input Port: Type-C.

Product Features

1. This product has multiple anisotropic multi-level Magnets, the magnetic force is strong.
2. Accurate positioning of charging to improve wireless charging efficiency.
3. One-touch charging, more convenient for mobile phone charging.
4. Newly upgrade tempered glass materials, reveal the beauty of science and technology.
5. With ring-shaped bracket, easy to place the phone in multiple angles.
6. Multi-functional protection, the phone will not be hot when charging.
7. It supports up to 15W wireless fast charging, compatible with 10W/7.5W/5W.

Instructions

1. Make sure this charger is connected to a power source before using this charger.

2. Put the phone on the charger, the phone shows charging, the charger will enter the charging state.
3. One-touch charging, more convenient for mobile phone charging.
4. Newly upgrade tempered glass materials, reveal the beauty of science and technology.
5. With ring-shaped bracket, easy to place the phone in multiple angles.
6. Multi-functional protection, the phone will not be hot when charging.
7. It supports up to 15W wireless fast charging, compatible with 10W/7.5W/5W.

Attention

1. Do not use the charger in a wet/high temperature environment.
2. Do not place metal objects (such as keys/coins, etc.) on the charger to avoid heat damage to the charger.
3. Please do not place magnetic materials (such as bank cards, ID cards, etc.) on the charger to avoid invalidation of the card.
4. Do not try to disassemble the charger by yourself. Disassembling the charger may damage it.
5. This product ring-shaped buckle is only used as a cell phone holder.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device must operate with a minimum distance of 20 cm between the radiator and user body.
