

|                 |             |
|-----------------|-------------|
| Type            | PCB antenna |
| Frequency       | 433.92MHz   |
| VSWR            | <1.5        |
| Gain            | 0dBi        |
| Input Impedance | 50 $\Omega$ |

We,Zhongshan Kedu Lighting Co., Ltd, states that All measurements were performed radiated and therefore additional antenna gain documentation is not required.
