2.4G (USB mode) connection guide

Plug the USB into your device and press 'fn+3'. The indicator light in the top right corner of the keyboard will turn red, indicating a successful connection. The red light will turn off after 2 seconds, which is normal and designed to save power.

Bluetooth connection guide

Press and hold 'fn+1' or 'fn+2' for 3 seconds, until the indicator light flashing rapidly, indicating that the keyboard is in pairing mode. You can find K599-BT1 or K599-BT2 on your device's Bluetooth page and click to connect. After a successful connection, the indicator light will stay on for about 3 seconds and then turn off, which is normal and designed to save power.

Note: if the keyboard's indicator light is flashing slowly, it means the keyboard hasn't entered pairing mode. You need to press and hold 'fn+1' or 'fn+2' for 3 seconds again to make the indicator light flash quickly before it can enter pairing mode.

Functions Description

F1	☼	Screen brightness-	F2	☼	Screen brightness+
F3		Task switching	F4	🔍	Search
F5	🎤	Microphone	F6		null
F7	◁◁	Previous Track	F8	▷‖	Play/Pause

Note: This is a keyboard designed for Mac systems. If you are using Windows or Android, please pay attention to the following instructions:
1. For Windows devices: You need to press 'fn+w' to adapt the keyboard to your device.
2. For Android devices: You need to press 'fn+E' to adapt the keyboard to your device.
3. You can use the multimedia functions by pressing 'fn+F1~F12'.

2.4G mode re-pairing method
Keyboard Re-pairing Method:

1. Turn off the keyboard, unplug the USB receiver, place the USB within 20cm of the keyboard.
2. Turn on the keyboard, Keeping press 'Esc'+ '=' for 10 seconds at the same time, then plug the USB receiver to the USB port, the keyboard will begin work.
Status Display LED

1. Turn on the keyboard switch, the power indicator light will turn on for 2 seconds and then turn off, indicating that the power is on. The light turning off is normal and designed to save power.
2. Charging: When the keyboard is charging, the power indicator light will be red. Once the keyboard is fully charged, the power light will turn off.
3. Low battery indicator: When the keyboard's battery is low, the power indicator light will flash, indicating that it needs to be charged. If the battery is insufficient, you may experience typing delays. Therefore, if you encounter typing delays, try charging the keyboard to avoid this issue.

Use tips

The keyboard has inteligent system identification function. If the system version cannot be identified (for example, the MAC shortcut key is incorrect), manually switch the corresponding system based on the current device system. Operation method: Hold down the key combination for 3 seconds. The blue light blinks, indicating that the switch is successful.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

   -Reorient or relocate the receiving antenna.

   -Increase the separation between the equipment and receiver.

   -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

   -Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
