

FCC ID LABEL:

Wireless charging Pad
Model:FMWCT06
Input voltage: DC3.5V-6.5V
Input port: TYPE-C or Lightning
Maximum transmission power: 2W
Overheat protection: 60°C /140°F
Charging operation: Align the receiving end with the transmitting end until the work light is turned on and enters the charging state. The working status of the indicator light is as follows:
Red light: standby - constantly on, flashing - abnormal
Blue light: flashing - working, fully charged - constantly on
Attention: Please use a qualified charging source and do not connect two ports to the power end at the same time. This product is not waterproof and generates normal heat during the charging process. If it overheats, it will automatically stop working. Do not continue charging for a long time, which will affect the battery life.
