The device is connecting to the network

Rapid flashing red light:
The device has entered the network configuration mode

Solid blue light:
The device is working and recording

Alternating flashing red and blue lights:
The device is running low on battery

Recharge your Camera

Recharge Your Camera First

Use the provided Type-C cable to charge your Camera. It takes approximately 3 hours to fully charge, depending on the power source. Please note that you should use a power source of at least 5V1A.

Type-C Charging Port
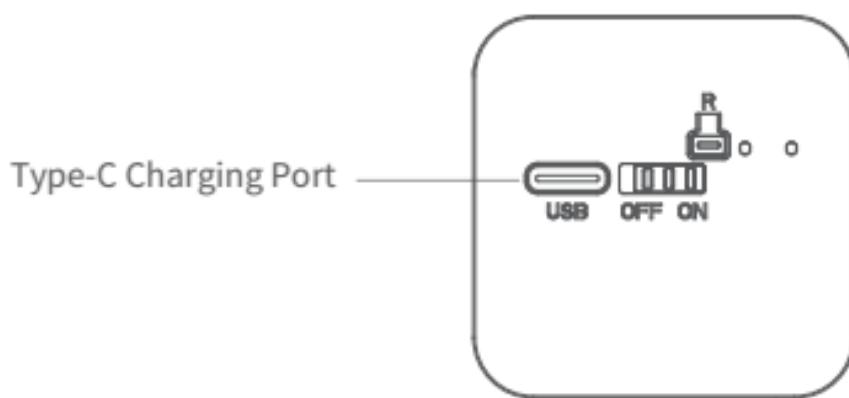

A solid Green light indicates that the Camera is charging. When the Camera is fully charged, the Green light will turn off.

Create an account in the Zoroiix app

1. Scan the QRcode provided or search for Zoroiix in the Apple App Store or Google Play. Then download and install the app.

zoroiix

ANDROID/IOS

2. Open the Zoroiix app on your cellphone and tap Sign up.

3. Enter your email address, set a password, and tap Sign up.
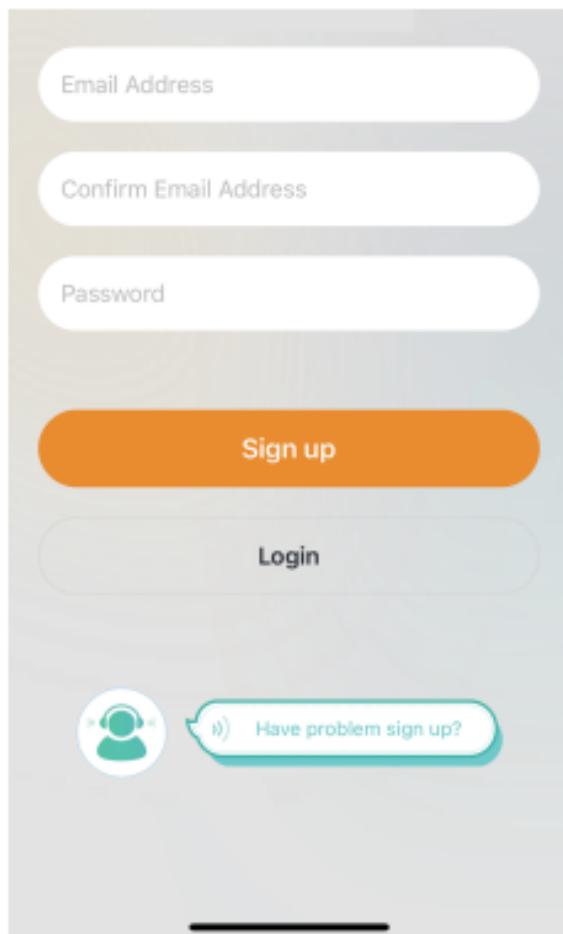

4. After activating your account with the email link, log in to the app using your email and password.

We have sent an email to xxx@xxx.com.
Open you email and tap the link to verify.
If you don't see the email,check your spam,or
tap "Resend email" below.

5. Re-open the Zoroiix app, enter your email address and password, and tap Log in.
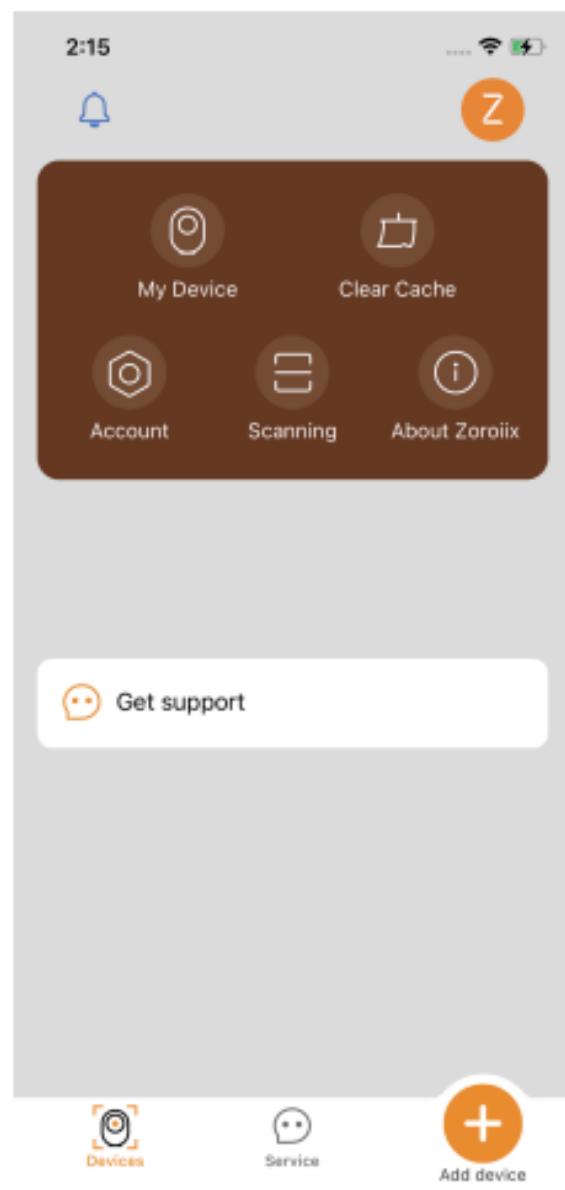

Set up your Camera in the app

1. Before setting up the camera, ensure your cellphone's Bluetooth 🅱 is turned on
2. Open the app and sign in to your account
3. To add your camera, tap the Add device icon (+).
4. Choose the Battery Camera and then select the X01 model.
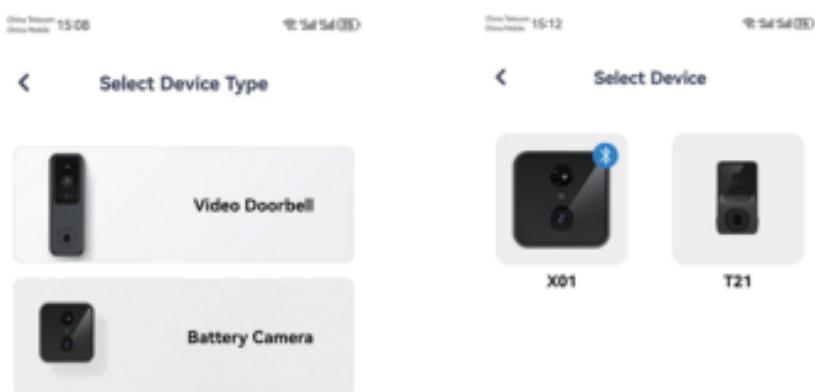

5. Push the Toggle switch to the "ON", then press and hold the Reset button until the Red light starts flashing. You will hear Entering pairing mode.
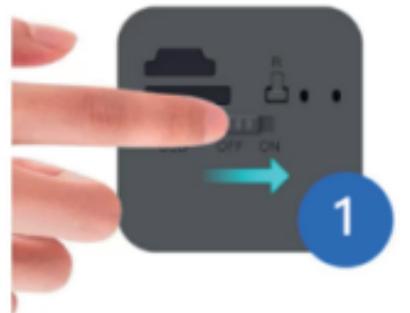

6. The device supports only the 2.4GHz Wi-Fi network. Navigate to your cellphone's Wi-Fi settings, connect to a 2.4GHz Wi-Fi network, and tap "Yes." (Note: 5GHz Wi-Fi is not supported).
7. For Connection Setup: Select your 2.4GHz Wi-Fi network name, input the password.
8. Tap Confirm.
9. Search for devices using Bluetooth and follow the prompted steps to connect to the device.

Bluetooth Connection

Search for Bluetooth devices 5s

Configuring the bluetooth device, please wait...

10. Once you hear Device registration successful, you are all set.

Press R (Reset) button on the back of the camera

Reset Button
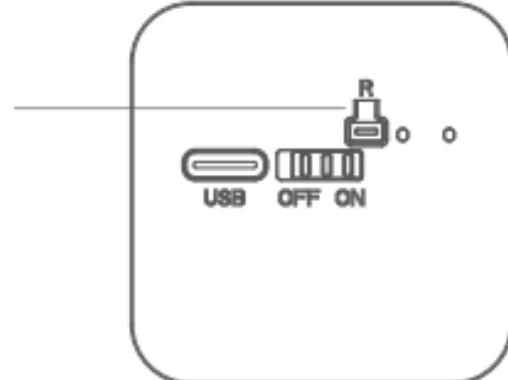

Frequently asked questions

1. How can I share the device with family members?

Open the app and tap on Settings. From there, you can share the device via QRcode or email, and even transfer ownership of the device. The new user must first download the app and create their own account.

2. Why can't I change the settings?

Only the owner account 🙂 can change settings, delete videos, and share the device. Shared accounts do not have these options.

3.How many users can view the device at the same time?

The owner account can share the device with up to 8 other accounts. Up to 3 users may view the video feed at once, but only 1user can use the intercom.

4.Is the 5GHz Wi-Fi supported?

No, the camera only works with 2.4GHz Wi-Fi. Please separate two Wi-Fi bands by giving the 2.4 GHz and 5 GHz networks each a unique separate SSID (network name). Then connect your device to the 2.4GHz Wi-Fi.

5.Why is my Wi-Fi signal weak?

Your camera may be too far from your wireless router, or there may be obstructions reducing signal strength. You might want to reposition your router or get a signal extender/repeater.

6.Why is the camera offline?

The camera being offline means it is disconnected. There could be a few reasons for this:

1) If the camera has run out of power, you will need to recharge it.

2) The Wi-Fi signal is weak, causing disconnection. Please improve your Wi-Fi signal and reconnect the device.

3) If the Wi-Fi is unstable, the device might go offline or experience interruptions frequently. You can try restarting the router and reconnecting the Wi-Fi to see if it helps. A good Wi-Fi connection is essential since the device is outside the house.

7.How can I adjust the human detection accuracy?

Open the app and tap on Settings. Then tap on Motion Settings. Here, you can select the desired human detection accuracy from three options: low, medium, and high. We recommend choosing medium. The high setting provides the strictest detection level, meaning the device will be triggered only when it is entirely certain that the moving object is a human. However, this stringent setting might cause the device to overlook a human figure, resulting in a missed notification.

- High Accuracy - The device will record videos less frequently, ensuring maximum battery life.
- Medium Accuracy - Medium battery life.
- Low Accuracy - The device will record ideos

- more frequently, leading to the shortest battery life.

If the areas you're monitoring experience excessive or repetitive
motions, like children playing in the yard, you may receive numerous alerts, which can rapidly deplete the battery of devices.
The human detection accuracy settings are designed to help you
receive the notifications you want while preserving battery life.

8.How can I enable notifications on my phone?
1) Open the app. From the Device page, tap the Settings icon, then tap the Motion Detection icon. Here, you can choose whether to turn Motion Alerts on or off.
2) Open your phone's settings. Navigate to "App Management" and "Notification Settings," then locate the app. Ensure all permissions and notifications are enabled for the app.

Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different.
from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Statement
To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter
