

SMART PATHWAY LIGHT SETUP

Step One: Make sure turn on Bluetooth of your mobile phone, and connect mobile phone with Wi-Fi Internet (2.4GHz).

Step Two: Download the “Smart Life” App to your mobile phone, and install the App. Scan the QR code below to download the App.

Or you can search the keyword “Smart Life” in Apple Store or Google Play to download the App.

Step Three: Create an account on Smart Life and login.

Note: Please keep your account and password in mind for Alexa or Google Assistant App pairing later.

Step Four: Add the smart pathway light to Smart Life App

1. Place the pathway lights where the Wi-Fi signal is good.
2. Power on the pathway lights, it will automatically enter pairing mode and flash. If the light is on constantly, repeatedly turn on-off-on-off-on-off-on the light to activate the pairing mode. Please make sure to keep an interval 1-2 seconds between each on and off.
3. Tap “Add Device” button at the center or “+” button on the top right corner to add devices.
4. Tap “Add” from the pop-up of “Discovering devices...” to complete pairing. If there is not a pop-up, tap “Lighting”, then choose “Light Source (BLE+Wi-Fi)” to add the lights.
5. Give a name to the smart pathway light, a simple name is recommended.
6. The named light will be shown on the homepage of the App. Now you can control the pathway light with Smart Life App. There are multiple light settings such as: on/off, adjust brightness, change colors etc.
7. In order to control multiple lights at the same time, a group can be created after they are all paired. Tap the name of any paired light, tap the 3 dots button on the top right corner, tap “Create Group”, and select the lights you want to group from the device list and rename the group to complete setup.

TROUBLE SHOOTING

If the smart pathway light disconnected with Smart Life App, do the following:

1. Check the 2.4GHz Wi-Fi signal is strong and stable.
2. Make sure turn on Bluetooth of your mobile phone and connect mobile phone with Wi-Fi.
3. Check Wi-Fi password is correct on Smart Life App.
4. Follow SMART PATHWAY LIGHT SETUP procedures above to pairing the pathway light.

FCC statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) This device may not cause interference.
- 2) This device must accept any interference, including interference that may cause undesired operation of the device.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device must operate with a minimum distance of 20 cm between the radiator and user body.
