

 <p>使用说明书 MO08多功信号探测器</p> <p>User Manual MO08 Multifunctional Signal Detector</p>	 <p>Product Functions: 1. Signal Detection 2. Laser Detection 3. Magnetic Field Detection 4. Vibration Alarm</p> <p>Operation Diagram: 1. Press and hold the function button for 2 seconds to power on the device; the screen will light up. Press and hold for another 2 seconds to power off. 2. The default function when powering on is signal detection mode. Press the function button to switch; press the confirm button to automatically adjust the sensitivity. Press and hold the confirm button for 2 seconds to switch between signal detection modes. 3. For magnetic field detection, the sensing element is located at the top of the device. Refer to the previous step for mode instructions. 4. If the device is pre-charged, press the confirm button to change the flashing frequency. The laser can be used to locate hidden cameras. 5. In the vibration detection mode, press the confirm button to start the countdown. When the display reaches 0, the device will enter the alert state. If vibration is detected again, the device will automatically enter the alert state. 6. Please use the original TYPE-C charging cable for charging. The device will not function while charging. When fully charged, the device will automatically power off and the screen will turn off.</p>	<p>Operation Instruction</p> <ol style="list-style-type: none"> 1. Also, stay away from radio and communication relay stations. <p>FCC Compliance Statement</p> <p>FCC Compliance Statement This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference; (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>Warning: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.</p> <p>Note: This equipment has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1. Reorient or relocate the receiving antenna; increase the separation between the equipment and receiver. 2. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.</p>
