How to set up wireless CarPlay

1: Start the car and wait for the car engine system to load. Keep your phone's Bluetooth and Wi-Fi enabled and not connected to any other signals.

2: Connect the Wireless CarPlay Kits to your vehicle's Type-A port with Apple CarPlay functionality. Note that if your car has more than one port, make sure to plug the Wireless CarPlay Kits into the Type-A port of the wired CarPlay.

Note: With a diagram of the data transfer ports, some of the ports will be wrapped in a white wire frame.

3: Open the Bluetooth interface of the mobile phone, find the Bluetooth signal of the Wireless CarPlay Kits "GC2-****", Click pairing, the phone will prompt "Bluetooth pairing request", click all prompts "allow", wait a few seconds to connect successfully. [Most will automatically access whether the phone matches, no need to manually click.]

Allow Contacts and Favorites Sync?

Your car may request your contacts, phone favorites, and recent phone calls over Bluetooth. Do you wish to allow this? CarPlay will work without syncing.

[Don't Allow](#)

[Allow](#) 

Use CarPlay with

"

GC2-****

?

CarPlay automatically connects your iPhone to your car's built-in display, and can access your phone while it is locked.

[Not Now](#)

[Use CarPlay](#) 

4: The Wi-Fi of the iPhone will automatically connect to the Wi-Fi signal "GC2-****" of the Wireless CarPlay Kits. Do not connect to it or any other Wi-Fi signals at this time. Please ensure that the Wi-Fi is not connected to other Wi-Fi signals.

- When the car screen switches to the CarPlay control interface, it means that the connection has been successful.
- After the initial pairing, when you use the Wireless CarPlay Kits again, it will automatically connect to your iPhone [ensure that your phone's Wi-Fi and Bluetooth are enabled]. In certain cars, you may need to tap the CarPlay icon on your car's display to initiate the connection.

Cyan status: Power on indicator

Green status:

- CarPlay connecting [green light fast flashing]
- CarPlay connected [green light slow flashing]

Function: Convert OEM Apple CarPlay to wireless Apple CarPlay

Compatibility: Car: with OEM Apple CarPlay

Control: OEM touch screen, steering wheel, and joystick control

Input Power: USB 5V~1A

Connectivity: Wi-Fi & Bluetooth

Operating Temperature: -25°C to +65°C

How to update or report

The CarPlay Kits works properly, it means the current version is suitable for your car. It is not recommended to update the firmware.

1. Power up the CarPlay Kits.
2. Connect the CarPlay Kits WiFi the password is "**12345678**".
3. Open web browser and enter "**192.168.1.101**" to enter the setting page and click "**Online Update**" for CarPlay function.
4. Return to the browser's page Click "**upgrade**".
[PS: When the update progress bar reaches 100%, the system automatically restarts and upgrades. During the system upgrade process, please do not power off.]
5. On the same page, you could also fill in the car brand, model, years, and more details, next tap "**Submit to**" to report the issue. Our engineers will record your problem and research possible solutions.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device must not be co-located or operating in conjunction with any other antenna or transmitter.

The device has been evaluated to meet general RF exposure requirement. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
