

1. The remote control samples 128 bit Keelog encryption method.
2. Transmission frequency: 433.97MHz
3. Emission intensity: less than 10mW
4. In open and flat areas, the remote control distance should be greater than 15M.
5. Working temperature: -40 °C~85 °C
6. Antenna manufacturer information: Hebei Kecheng Circuit Board limited company
7. RF CHIP:SI4010
8. Antenna type:Printed circuit board antenna

Antenna plate	PCB ANTH
Make name/model name	EZ9A061820023
Antenna gain	10dBi
Frequency range	433.97MHz
Connector type	direct
Antenna type	PCB
