

Product specification

QuickReferenceDate

	Antenna module on the system board	
Frequenc Range:	433MHz	
Gain:	2dbi	
Input Impendence(ohm):	50	
V.S.W.R:	<1.8	
Manufacturer:	Sino Innovation (Beijing) Technology Development Co., Ltd.	

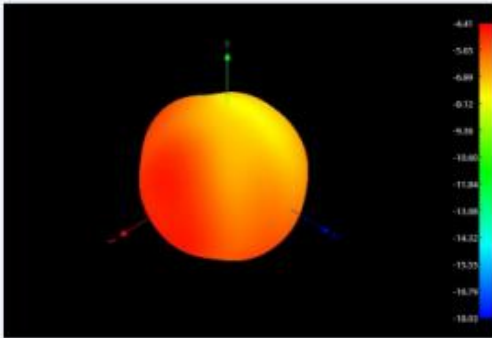

All the technical data and information contained herein are subject to change without prior notice. We state that all measurements were performed in an anechoic chamber and therefore additional antenna gain documentation is not required.
