4. Volume-

Click cut down the volume and long press the last song

5. TYPEC charging input

6. Status indication

7. Microphone call input

8. Stretch the sliding arm

9. Transmitter

- direction for use

1. Insert the transmitter plug port into the corresponding USB port of the computer console or the game console. For the first time, the computer will have a new hardware device and enter the recognition state (if you want to restart the computer, please follow the prompts). The indicator light enters the flashing state to be connected to the headset.
2. Long press the switch button for 3 seconds, and the state light flashes to connect. When the state light becomes always on (note: the green light represents dongle mode and the blue light represents Bluetooth mode), it means that the headset has been successfully connected and the headset can be operated. Double-click the multifunction key to switch the mode. The phone opens Bluetooth to search (search name: K90W), click the name to match the connection. After the connection, the headset can be operated accordingly.
3. Turn on the audio player, and choose your favorite song. Now you

can happily enjoy the beautiful music brought by this earphone.

4. When you feel that the sound is not suitable for you in use, you can also achieve a soft sound through the volume adjustment on the computer or the volume and sound size adjustment on the headset.
5. If you are using a certain voice software, you can also talk to the other party through this headset. Your voice will be clearly delivered to the recipient by the microphone delivery port.
6. When you do not need a microphone to talk, you can click the multi-function key to turn the microphone on or off (by default)
7. When you want to switch between your phone and your computer at will, you can switch between the phone and the computer by double-clicking the multi-function switch button (your phone and the computer are connected to the headset at the same time)
8. When the headset indicates that the battery charge is low, please charge it through the worn charging cable. When charging, the charging indicator is red and goes off after being filled.

- **Specifications and parameters**

Horn impedance: $32\ \Omega$

Sensitivity: $103\text{dB} \pm 3\text{dB}$

Frequency range: 20 HZ-20 KHZ

Microphone: $\Phi\ 6.0\text{MM}$

Sensitivity: $-42\text{dB} \pm 3\text{dB}$

Frequency range: 100 HZ-10 KHZ

Impedance: 2.2K

- **matters need attention**

2. Do not use this product for long-term use exposed to sunlight, wet or humid environment;
3. Do not operate this product when the temperature exceeds the specified range of 0 °C to 40 °C. (If in the ambient range beyond the specified temperature, turn off the equipment and let the temperature stabilize within the specified operating temperature range)

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses

and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
