

# User Manual for Car Keys

## 1. Introduction

This user manual is designed to help you understand and correctly use our car keys. Our car keys are precision-engineered products that offer convenience and security for your vehicle access.

## 2. Product Features

- Durable Construction: Made with high-quality materials to withstand daily use and environmental factors.
- Advanced Encryption Technology: Ensures reliable and secure communication with your vehicle's locking and ignition systems.
- Ergonomic Design: Comfortable to hold and easy to operate.

## 3. FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The

device can be used in portable exposure condition without restriction

#### 4. Battery Installation

- Locate the battery compartment on the car key.
- Open the compartment carefully following the indicated direction.
- Insert the correct type of battery (usually a CR2032 or similar) with the positive (+) and negative (-) poles in the correct orientation.
- Close the battery compartment securely.

#### 5. Pairing with the Vehicle

- Insert the key into the vehicle's ignition or follow the vehicle manufacturer's specific pairing procedure (for keyless entry systems).
- Some vehicles may require you to turn the ignition on and off a certain number of times or press specific buttons on the key and the vehicle's control panel simultaneously.
- Wait for the vehicle to recognize and pair with the key. This may be indicated by a flashing light or a beep.

#### 6. Button Functions

- Lock Button: Press this button to lock the vehicle's doors.
- Unlock Button: Press to unlock the doors.
- Trunk Button (if applicable): Press to open the vehicle's trunk.
- Panic Button: In case of an emergency, press and hold this button to activate the vehicle's alarm system.

#### 7. Troubleshooting

- If the key does not work, first check the battery and replace it if necessary.
- Ensure that you are within the effective range of the key's signal.
- If the problem persists, contact our customer service for further assistance.

#### 8. Maintenance

- Keep the key clean and dry. Avoid contact with water or other liquids.

- Do not expose the key to extreme temperatures or strong magnetic fields.

## 9. Warranty

Our car keys come with a limited warranty. Please refer to the warranty card or contact our customer service for details.
