1. Level 1 Hibernate: If there is no activity for 60 seconds, the mouse enters Level 1 hibernation mode (wakeup available via key press, movement, or scroll wheel)

2. Level 2 Hibernate: If there is no activity for 10 minutes, the mouse enters Level 2 hibernation mode

Driver Download and install

Please download and install the driver from the Burstiger official website. Here is the link to download the driver:

<https://www.burstiger.com>

Note

- Driver settings only support 2.4G and Wired mode, and cannot be used in BT mode (if the driver is opened in BT mode, it will prompt "device not recognized").
- The driver is only for PC, not for Mac.

Battery Life and Sleep Mode

With a 300mAh rechargeable lithium battery, the mouse can last for up to 60 hours at a single charge under 1000Hz polling rate. And the battery can be fully charged in about 3 hours.

Mouse enters stand-by mode after 10s and enters sleeping mode after 60 second.

This time can be modified by driver. Moving the mouse to wake it up.

FCC Warning Statement:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
