**STEP 3** : Click on "REC" to start recording the macro instructions. Click on "STOP" to save macro.

---

## To Assign a Macro

**STEP 1** : Select the "Button settings" Tab.

**STEP 2** : Click on the key you would like to assign the macro and select "Macro Function".

**STEP 3** : Select the macro you selected and choose the preferred releasing method.

**STEP 4** : Press "Save Icon" to save settings.

### STEP 1 : Keycap Removal

Use the supplied keycap puller and press down on to the keycap to secure the puller on it. Pull the keycap puller directly upwards to remove the keycap. If the switch is removed as well, simply pull the keycap off the switch and just reattach the switch on to the keyboard.

### STEP 2 : Switch Removal

Rotate the switch puller too to a vertical position to coincide with the switch locks located at the top and bottom of each switch. Push the switch locks in and pull the switch puller directly upwards. We suggest to take extra care when removing switches so as not to bend the switch pins. Please also take extra caution so as not to scratch the keyboard's backplate.

### **STEP 3 : Check switch pins**

Please inspect each switch to make sure the switch pins are straight before inserting them to the keyboard. Make necessary adjustments if needed as inserting them with bent switch pins may further damage the switch.

### **STEP 4 : Inserting a new switch.**

Align the switch pins to the holes of the keyboard. The switch will snap on to place and test immediately for response.
