Instruction

I. Function key

There are two touch buttons plus one USB power supply (5V/1.5A) socket on the control panel of this sanding dust collector.

- The left button is used for wind speed adjustment. Touch this button when power on to start the fan, then keep pressing on this button to raise the wind speed, keep pressing this button again will lower the wind speed. (meanwhile, wind speed would be displayed on the lighting belt by means of percentage.) A brief touch on this button again will turn the fan off.

- The right button is used for lighting control. The light belt will automatically glow once the unit is power on. A brief touch on the button would turn light be off, touch again to turn it on. Once light is on, keep pressing this button will turn lights brighter, pressing it again to dim the lights.

II. Lighting set up

- Push left and right key simultaneously for 3 seconds to enter lighting set up mode. You may customize your lighting effect under this mode.

- Push left key once under set up mode to enter next lighting effect.

①Symphony streamer

A long push of right key for stepless RGB color changing, release key to finish.

⑬Continuous lighting

A long push of right key for stepless color temp changing, release key to finish.

Usage Example

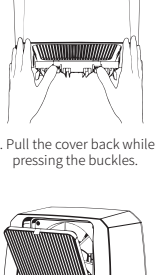

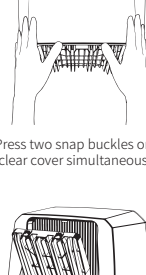

Try to put grinding surface pointing towards dust suction port where possible. Do not let the back of your hands get too close to the suction port, which will reduce dust collection efficiency.

For best results, the object to be sanded should be kept within a distance of 15 cm to the dust collecting duct.

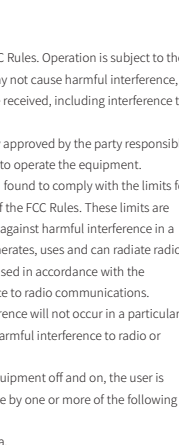

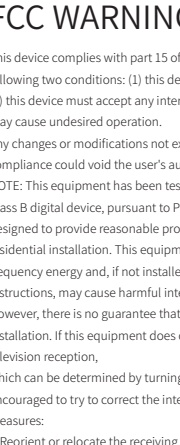

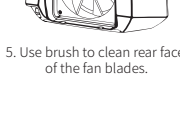

Intelligent Control

- Download DSPIAE Hub APP (available for ios 14, Android 8 and up) iOS Users may scan the QR code below, or search 'DSPIAE Hub' at App Store to download. Android users may scan the QR code below, or search 'DSPIAE Hub' to download.

- After registering the application, press 'solaris chroma' icon to enter configuration interface. (Please turn on the Bluetooth of your phone)

- Click on the drop-down menu to select product name for connection. Default wireless connection mode of this product is always on, so you don't need to open it manually. Enter control interface after connection.

- Now you may start customizing your sanding dust collector once you are in the control interface. For more details on operational instruction, click 'manual' button on the upper right corner of the screen.

Maintenance & Cleaning

(Always clean your equipment AFTER plug out)

Cleaning the front end
