17. Audio Indicator Light, blue light flicker when not connected, blue light will be on when connected successfully, red light will be on when charging, red light will be off when full.

Product information

- Product name: WIRELESS KARAOKE SPAKER
- Product Model: K12
- Implementation Standard: GB-T9254.1-2021
- OUTPUT POWER: 5W
- Input Signal: K20B
- Battery: High Performance High Capacity Lithium battery
- Charging voltage: DC5V
- Frequency range: 90Hz-18KHz
- Power mode: DC charging and built-in Battery

Main functions

- High reduction electro-acoustic system
- 3.7 V high performance battery
- Sound penetration, wide coverage
- Super MP3 audio decoding technology
- All digital audio processing, clear voice quality,
- high sensitivity

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
