

C940

Instruction manual

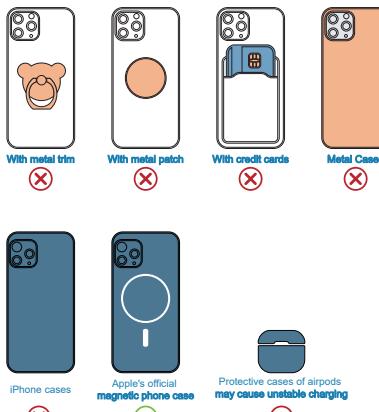

3 in 1 Magnetic Wireless charger

Wireless Charging Guide

Please use the Type-C Port Adapter.

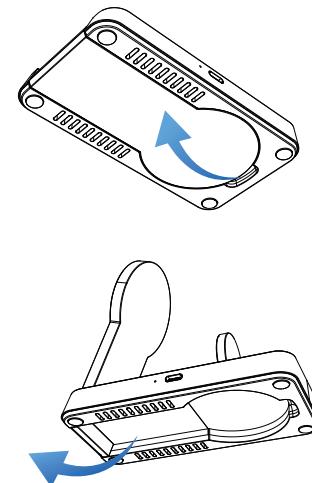

Charging with cases

1. Introduction:

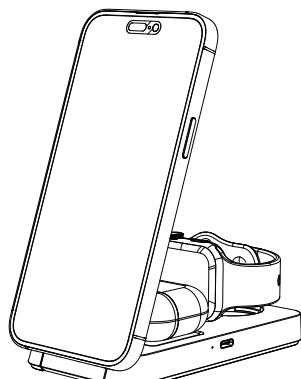

- ① Magnetic Wireless charging area for iPhone.
- ② Wireless charging area for AirPods.
- ③ Wireless charging area for iWatch.
- ④ Operating indicator light.
- ⑤ USB Type-C Female Connector.

How to Use

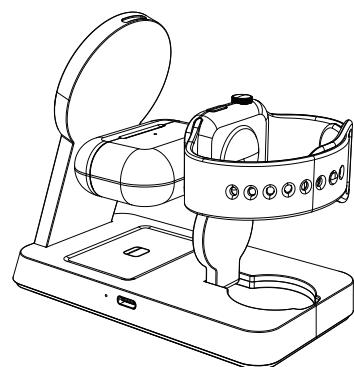

2. Operation instructions:

2.1 Put the iPhone upright in the magnetic wireless charging zone, the "Operating Indicator light" on the phone's display will confirm that it is charging correctly.

Remark: Only for Apple magsafe and cases with magnets.

2.2 Charging the iWatch: Place the iWatch on the designated wireless charging area and align it with the magnets. The "Charging Indicator light" on the iWatch will illuminate, confirming that it is charging correctly.

2.3 Charging for AirPods: Place the earbuds flat on the wireless charging pad. Ensure that the charging indicator on the Bluetooth headset illuminates, signifying normal charging.

2.4 This product requires a 9V-2A adapter for power, which should be connected to the Type-C port. When the power indicator on the side lights up, it means that the power supply is properly connected.

2.5 Operating indicator: The blue working indicator is always on during the charging process of the mobile iPhone, which is off when it is not being charged or fully charged; it will flash in case of any charging fault.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
