User Manual

Starting for the first time

Connecting the Power Supply

Connect the power adapter and power cord to the main unit

- A.** Connect the power cord and power supply as shown in the illustration.
- B.** Plug the 5.5*2.5MM power connector of the power adapter into the DC port on the computer side, and the power connector should be plugged to the bottom.
- C.** Plug the power cord into the socket, and press the host on button to turn on the computer.

CAUTION:

- The computer host must use our original power adapter to ensure stable power supply.
- Preferably connect the power adapter to an outlet near the computer.
- When you turn off the computer, disconnect the power supply and remove the plug from the socket.

Using your Mini PC

Connect an external display

The compatible interfaces of the display connected to the computer mainframe are as follows:

◆ DP port

◆ HDMI port (When the display's port is HDMI, you need to use the HDMI adapter cable.)

✂ We are equipped with HDMI cable by default, if you need another interface adapter cable, please communicate with customer service at the time of purchase.

Example: Connect the display through the HDMI adapter cable.

Using your Mini PC

Connect to a Bluetooth-enabled device

You can connect all types of Bluetooth-enabled devices to your computer, such as a keyboard, a mouse, a smartphone, or speakers. To ensure that the connection is successful, place the devices 10 meters (33 feet), at most, from the computer.

1. Click the action center icon in the Windows notification area. Enable the Bluetooth feature.
2. Click the bluetooth options to add a bluetooth device, and then follow the on-screen instructions.

Start up the computer

Lightly press the power on button on the main unit for 1 second, the power on button light will light up immediately. 7 colors of RGB breathing light will light up cyclically to indicate successful power on.

Turn off the computer

Do either of the following to shut down your Mini Desktop PC:

Click from the Charms bar then Click Shut down to Powerdo a normal shutdown.

If your Mini Desktop PC is unresponsive, press and hold the power button for at least four (4) seconds until your Mini Desktop PC turns off.

Entering Sleep Mode

Activate sleep mode on your Mini Desktop PC using either of the following procedures:

- ▶ Press the power button once.
- ▶ Launch the Desktop mode then press <Windows>+ <X> to launch the Shut Down window. Select Sleep from the drop-down list then select OK.

Troubleshooting

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

*RF warning for Mobile device:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
