2

LED Light Guide

☀	Solid Red	Camera initializing
☀	Flashing Blue	Camera is ready for setup
☀	Blue and Red Alternating	Connecting to internet
☀	Solid Blue	Camera is online

3

Set up the Camera

Step 1

Connect the camera to power with the included power cable and power

Step 2

Scan the QR Code to download CareCam Pro APP

Download the "CareCam Pro" APP from the App Store (iOS devices) or Google Play (Android devices).
4

Step 3.

Connect your phone to a WiFi network and have Bluetooth enabled

5

Step 4

Open the APP, enter your email and password to log in. If you do not have an account, please complete the account mregistration first, and then you can enter the APP.

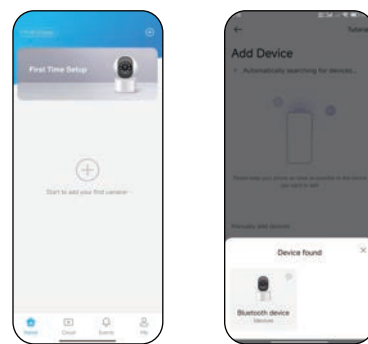

6

Step 5

Click the "⊕" in the upper right corner of the APP to add a camera.

### Step 6

Please click on the discovered Bluetooth device.

7

Step 7

Complete device binding according to APP guidance.

Step 8

Device added successfully. You can rename the device.

8

Mounting the camera

The camera can be placed on a table or a shelf, or can be mounted on a wall or ceiling. Choose a location and height that meets your viewing requirements and is within reach of a power outlet and is not too far away from the router.
⚠ Note: Please ensure that the camera maintains a minimum distance of 0.7ft/0.2m from any objects or walls to prevent infrared reflection, which could affect the performance of night vision.

Install on a wall

❶ Mark the screw position on the wall with the drill template and drill 2 pilot holes

9

---

❷ Drill the 2 screws in and leave a space of 1.5mm. Attach the camera base onto the 2 screws to secure the camera

10

Record on a microSD card

Insert a microSD card and format it in camera setting menu, which allows camera to record locally even if camera is disconnected from the internet.

Record on cloud storage

In APP, subscribe to a cloud storage plan to back up your footage in encrypted data center, to ensure that you still have critical footages even if camera is stolen or broken.
Storage Option

The Alaga K10 camera offers two storage alternatives. You have the option to save the footage either on a microSD card or by subscribing to a cloud storage plan. To enhance security, we advise utilizing both methods to back up each other, ensuring that no critical footage is lost even if the camera malfunctions, is stolen, or goes offline.

Frequently Asked Questions

I cannot connect the camera to the Internet

Check the following steps:

- Ensure Wi-Fi password or SSID is correct
- Reset the camera and try again
- Try placing the camera as closely to the router as possible
- Ensure camera is powered on and the indicator is flashing in Blue before starting to connect
- Ensure Bluetooth is turned on your phone and Bluetooth permission is allowed for APP
- If the above steps don't help, contact our professional technical support via phone, email or live chat

What can I do if the camera stopped working?

- Close the APP and restart the APP again
- Check if Wi-Fi password or Wi-Fi router is changed. If so, please reset the camera.
- Ensure Wi-Fi router is powered on and online
- Ensure camera has power
- Ensure the phone has decent network bandwidth
- Check if the APP is on latest version
- Try different power adapter, USB cable or power outlet

12

What can I do if the camera keeps getting offline?

- Ensure the camera is not too far away from the router
- Ensure your Wi-Fi is working properly. Check the status of other devices such as laptop or smart and see if you can stream videos
- The routers may get overloaded sometime, try restarting your router and wait for 2-3 mins
- Check if the camera is on latest firmware

How to record on microSD card?

- Ensure the microSD card is installed in the correct direction
- Format the microSD card in APP to enable recording
- After the card is formatted, choose to record all-day or by incident only in the 'Manage Storage' menu
- If the camera does not detect the microSD card, try formatting the card to FAT32 using a PC

What can I do if I receive too many notifications?

In 'Device Setting' menu, try adjusting the following settings to improve detection notifications:

- Turn on human detection to only get notified when a human-shaped object is detect
- Adjust detection sensitivity setting to low

13
