## FCC warning statements:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

**Please read the notes carefully:**

- To ensure stable power supply, please use national standard power cable and power cord with grounding;
- Please use the type of power supply indicated on the projector and the supplied power supply for power supply;
- Please do not disassemble the machine yourself, otherwise the company will not undertake warranty service;
- Do not look directly at the projector lens while the machine is working, it might cause damage to your eyes;
- To prevent clogging the projector vents, do not cover them with cloth, carpet or other materials;
- This projector does not have waterproof function, please keep it away from rain, moisture and other items containing liquid such as vase, cup, etc;
- To prevent electric shock, please keep the projector away from rain, water or moisture;
- Cut off the power supply if do not use this projector for a long time;
- Use the original foam or other anti-shock material to protect projector if you need transport this projector;
- If you find the projector has problems, please contact with the supplier, do not repair by yourself;
- To extend the projector life span and protect your eyesight, we suggest you may have a break after 3-4 hours using.

**Maintain Indication:**

1-year warranty from factory, for more warranty information, please contact with supplier. (Warranty service does not include housing, instruction manual, packaging and user's personal subjective objections to image, sound quality, timbre, etc.)
