

Instruction Manual

K07

K07 Helmet headphones

Please read this manual carefully before using the product and keep it properly

Installation tutorial

Fixed installation by clamps

- Step 1**
-
- Secure the product to the back dip, back clip, and helmet.
Attach Velcro separately to fix it, and pull the steel dip.
Simply fix it to the left edge of the helmet.
- Step 2**
-
- Stick the headphone Velcro separately into the Bluetooth headphone groove on the inside of the helmet.
- Step 3**
-
- Attach the speakers to the Velcro positions on both sides of the helmet.
(Short line horn on the left, long line horn on the right).
- Step 4**
-
- Attach the microphone Velcro to the inside of the helmet near the mouth. Paste the microphone (organize the label and lining).
- Step 5**
-
- Insert the plug into the headphone jack.
- Step 6**
-
- Installation is complete.

Notes

- Do not touch the product with sharp objects to avoid scratches or damage.
- Do not expose the product to open flames to avoid explosion hazards.
- Do not attempt to disassemble the product to avoid damage.
- If the product is not used for a long time, please store it in a dry place and charge it regularly (once a month) to ensure that the product can work properly.

the power delivered by the charger must be between min [0.3]Watts required by the radio equipment, and max [3]Watts in order to achieve the maximum charging speed.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
