Foreword

Congratulations on owning a brand new smart photo frame!

If this is your first time using a smart photo frame, you can start by following the quick settings in the frame or follow the on-screen instructions on the first startup.

Once you have set up the smart photo frame, you can start connecting it with friends and family.

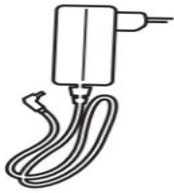

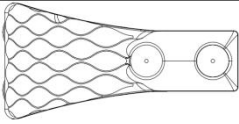

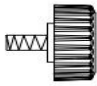

Whale Frame

Whale Frame showcases the exciting moments of mobile device sharing. Easy to operate, vivid and interesting, making it more convenient for users to view and share their precious memories.

Whale Web

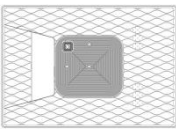

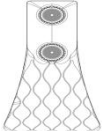

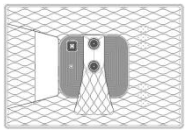

Whale Web is a convenient and fast web-based photo sharing tool that can be accessed without registering an account. It supports sending up to 500 photos at once, making it easy for you to share your precious memories.

1. Packaging List

		
Digital photo frame * 1	Power supply * 1	Type-C USB cable * 1
		
Picture frame bracket * 1	Bracket screws * 2	User Guide * 1

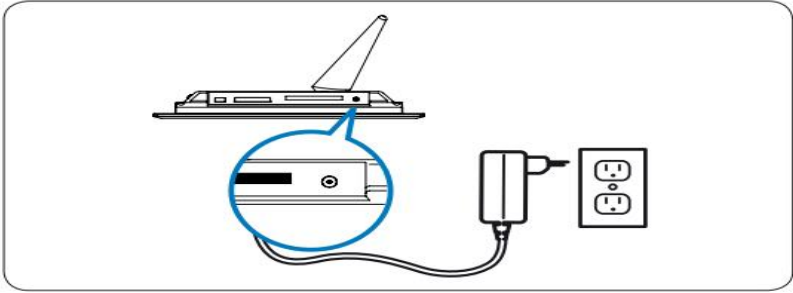

2. Installation and Connection

2.1 Bracket Installation

				
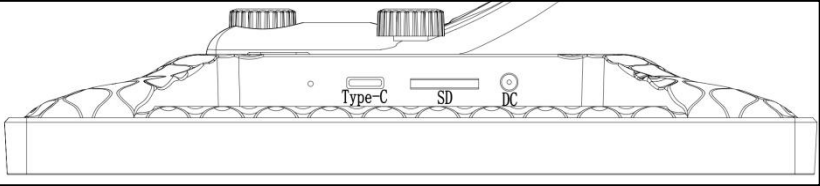

Take out the photo frame, with your back facing up, and place it horizontally on the desktop	Remove one bracket	Remove 2 screws	Align the screws with the bracket and the screw holes on the back of the photo frame and tighten them	When the screen is vertical, install it in the direction shown in the diagram

2.2 Power Connection

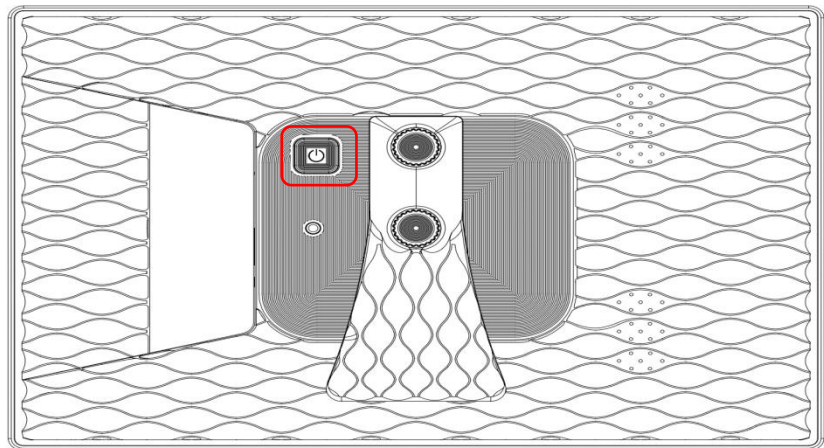

After removing the power supply from the packaging and connecting it to the DC port of the photo frame, the frame will automatically turn on. Wait for the system to enter and follow the prompts to operate.

3. Interface Description for Photo Frame

	
直流电	Power interface 5V2A
TYPE-Cinterface	Support importing photos and videos from computers
微型 SD	Support importing and playing photos and videos from Micro SD cards

4. switch buttons

Function Description:

- ◆ Press once: When turned on, press once to turn off the screen; Press once in the off screen state, and the screen will light up.
- ◆ Long press for more than 2 seconds: In the power on state, long press for more than 2 seconds, and the screen will display "restart" and "shutdown". Click the "restart" and "shutdown" buttons on the screen with your finger, and the product will execute the corresponding command

5. Basic Parameters

model	RPF010101
size	10.1inches
service life	25000hrs
Screen resolution	800*1280

6 Software Usage Instructions

6.1 APP Download

The Whale App mobile supports rich features of Android and iOS systems, making it easy to share with connected photo frame devices anytime, anywhere. No matter where you are in the world, you can send photos anytime.

How to download the Whale App?

	Download by scanning the QR code
	Log in to the relevant mall and download the APP
	Android: each for Whale' on Google Play IOS: each for 'Whale' on the App Store

6.2 How to use Whale Frame

When starting the frame for the first time, it is necessary to set up the frame.

Whale Frame may require you to upgrade to the latest version. If required, it is recommended to upgrade the photo frame before continuing with the operation.

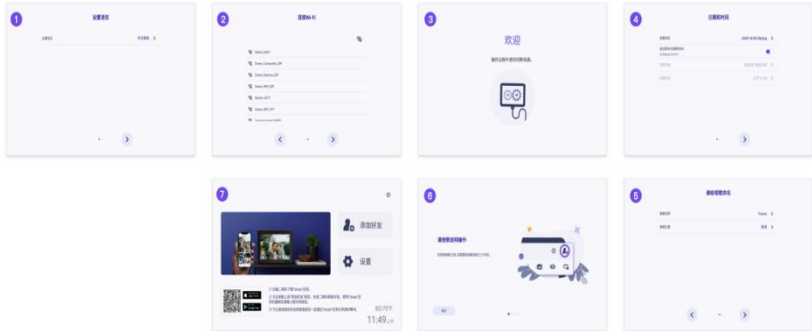

Choose a language. This will be the language used on Whale Frame.

Connect the frame to the Internet via Wi Fi.

Set the date and time, and if necessary, set the time zone.

Enter the name and usage scenario of the photo frame, such as "Jack" and "living room", "kitchen" or "office".

Check the Quick Use Guide to learn about photo frames.

6.3 Share Photos

You can share photos/videos in 4 ways.

You can download the "Whale"app through Google Play and App Store. Before sharing, please bind the photo frame. After successful binding, you can share photos/videos to the frame through the application.

6.3.1 Adding Friends

Ensure that your photo frame is properly connected to the network and that your phone has downloaded and installed the Whale application.

Method 1: Click  on the add friend icon on the photo frame. A dialog box will pop up displaying the bound photo frame, and the system will generate a random pairing code and QR code, valid for 48 hours. Share this invitation code with your friends in the way you like, such as SMS, email, instant messaging tools, making phone calls, etc.

Method 2: Open the Whale App, click on the frame tab, and you can directly use a scan to scan the QR code on the frame to add a frame, or enter the pairing code on the frame to add a frame.

Once the photo frame is successfully added, it will display the bound account in the photo frame settings account management and send photos to the frame at any time.

6.3.2 Whale web

You can visit Whale web to share, address: <https://Whale.zeasn.tv>

Note: If you have already registered an email account on the Whale App, you can log in by using your account and password or scanning the QR code on the web. If not registered, you can log in using a guest account.

6.3.3 External devices (such as SD cards)

You can copy photos and videos to an external device (such as an SD card), then insert the external device into the photo frame and import photos into the frame by going to Frame - Settings - Manage Photos - Import Photos.

6.3.4 Card insertion playback (such as SD card)

You can directly play photos and videos from external devices (such as SD cards) without importing them.

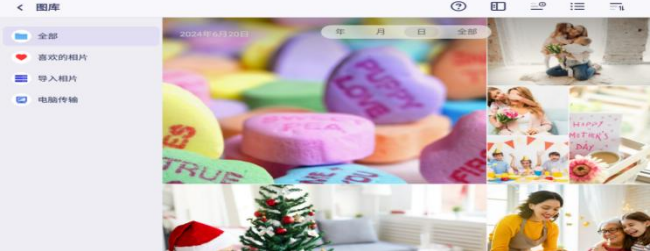

6.4 Homepage Function Description

Operate your photo frame through touch screen, swipe left and right to browse photos, and to access the menu, simply click once on the screen to bring up the menu.

You can quickly add friends through the menu, enter the gallery and settings, and also make related settings such as hiding and adjusting the currently displayed photos.

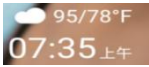

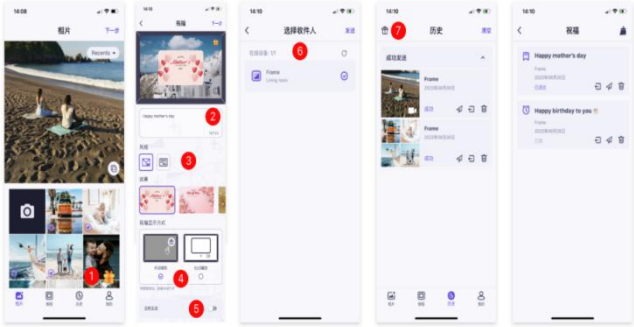

function	describe
<div>Add friend</div> <div></div>	<div></div> <p>This operation will generate a pairing code and QR code that you can share with your friends and family, allowing them to connect to your frame and send photos to it.</p>

<p>gallery</p> 	 <p>Open the gallery and easily and quickly browse photos in the gallery.</p> <p>In the gallery, you can view photos shared by different accounts by categorizing them.</p> <p>In the gallery, you can hide the category list to view more photos.</p> <p>In the gallery, you can view photos in chronological order.</p> <p>In the gallery, you can only view videos or photos.</p> <p>In the gallery, you can play a specific category separately.</p> <p>In the gallery, you can directly view photos on the SD card/USB.</p> <p>In the gallery, you can directly view photos transferred from the computer.</p> <p>In the gallery, you can easily find and review your photos and videos through the time tab.</p>

<p>Manage photos</p>	 <p>Used Memory</p> <p>In the photo management menu, you can view the number of photos and storage space occupied by the</p>

frame. You can also check the remaining storage space of the device.

Show/Hide Photos

Select the photo to hide by tapping on it. Hidden photos will not be deleted from the frame and can be re displayed at any time.

You can use  select all or deselect photos.

My Collection

You can use  select all or deselect photos, or use

 remove photos from your favorites list.

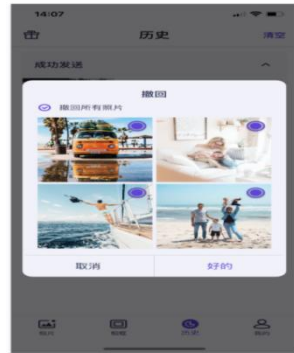

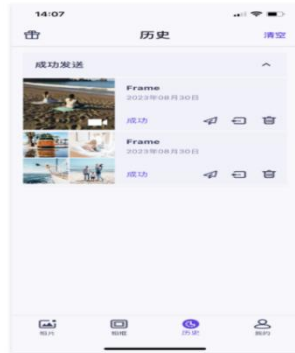

Delete photo

Select the photo you want to permanently delete from the frame by tapping on it.

You can use  select photos by selecting all or deselecting them, or use  deleting them.

You can also recall photos/videos that have been sent to the frame from the Whale mobile application (note: recall is only valid when there is a preserved history and the frame remains online).

You can select the photo you want to recall in the "History" section of the Whale app, and then recall it.

Import photos

Allow you to import photos from external storage devices such as micro SD cards.

Before attempting to import photos, please ensure that the external storage device (such as a micro SD card) has copied the photos you want to import.

Select the photos to import into the frame. After selection , tap the import button to start importing.

Export photos

Allow you to export photos from the frame to an external storage device (such as a micro SD card).

First, select the photo to export to the frame. After selection, tap the export button to start exporting.

Transfer from computer

Allow you to copy photos and videos from your computer to the frame via a USB cable.

1. Connect the computer and photo frame using a USB cable.
2. On the photo frame, go to Settings - Manage Photos

	<p>and find the option to transfer from computer.</p> <p>3. Open the computer transfer page, and the photo frame will automatically start connecting to the computer. After successful connection, the connected status will be displayed. When connected, you can copy photos and videos from your computer to the frame.</p> <p>4. Open your computer and you can find the photo frame folder "DCIM" in File Explorer.</p> <p>5. Copy the photos and videos you want to copy to the "DCIM" folder.</p> <p>6. Wait for the data copy to be completed. After the copy is complete, you can view and play the photos and videos you copied in the photo frame gallery. The copying speed depends on the number of photos and videos you have.</p> <p>Play from external storage</p> <p>When your photo frame detects an external storage device, it will automatically read and display photos and videos from the external storage device. If you do not wish to display photos and videos from external storage devices, you can choose to turn off this feature.</p> <p>blissing</p> <p>Manage the received blissing records, support viewing, batch reading, deletion and other operations.</p>

6.6 Whale Web

function	describe
----------	----------

log on

After successful login, the web end will automatically synchronize the information of the APP end (such as avatar, nickname, and bound device). Supports three ways to log in to the web.

Scan code to log in

You need to access the Whale web website:
<https://Whale.zeasn.tv>

Note: You need to download, install, and open the "Whale" app on your mobile phone, then use "Scan" to scan the code and log in.

Account login

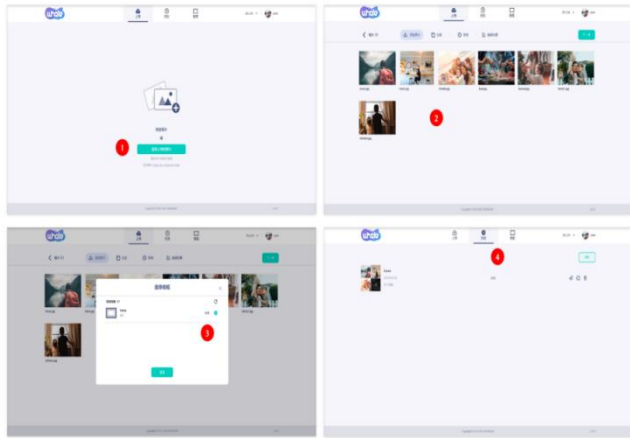

Support logging in to the web through account and password.

Note: The web version does not support email account registration. You need to download, install, and open the "Whale" app on your mobile device to register your account.

Tourist account login

The cloud also does not maintain data, and the accounts created are temporary. As long as you change your browser or clear the cache, all temporary accounts and information generated by the account will be deleted.

Photo selection

1. Select images (up to 500 supported,formats supported: jpeg/jpg/png/bmp/Webp)

2. Image editing

1) New: Add a new photo to the existing list.

2) Select All: Click on "Select All" to select all photos, and the number of selected photos will be displayed in the upper left corner. Click 'Select All' again to cancel the 'Select All' status.

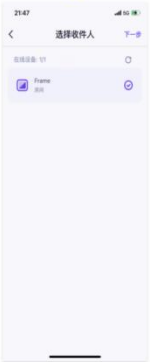

3) Remove: The photo mode has been selected and supports removing photos from the current transfer list.

4) Batch photo naming: The photo mode has been selected and supports batch renaming of photos.

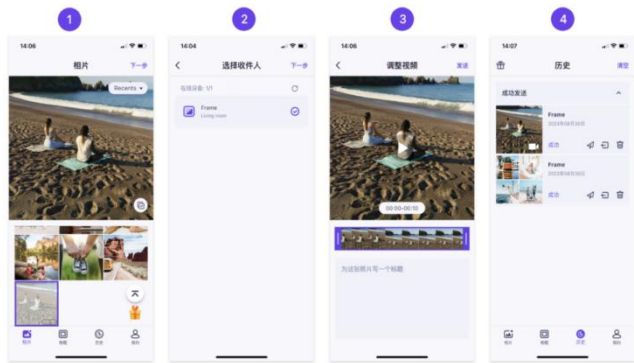

5) Single photo naming: supports editing of individual photos.

Note: Photo sharing is not possible in edit mode. Only by exiting edit mode can you select a photo frame for sharing.

3. Choose a photo frame (supports sending one or more

	<p>frames)</p> <p>After clicking send, you can check the sending status in the taskbar or history</p>
<p>Quick Settings</p>	<p>The APP is a mobile transmission tool, and you can log in using your tourist account or email account.</p> <p>Tourist account: The cloud also does not maintain data, and the accounts created are temporary. As long as you uninstall or reset the app, all temporary accounts and information generated by the account will be deleted.</p> <p>Email account: The cloud will retain your usage data (such as profile picture, nickname, frame binding relationship), and the data will exist when you uninstall/reset the app or log in with a different phone.</p>
<p>Photo Sharing</p>	<div><div><p>1</p></div><div><p>2</p></div><div><p>3</p></div><div><p>4</p></div></div> <p>Share photos: divided into image sharing and video sharing.</p> <p>Image sharing: Select an image (up to 50 images) - Choose a frame - Edit the image (adjust key areas and photo</p>

names) - Send.

Share video: Select video (only one video can be selected, 30 second long video) - Select frame - Edit video (video length and video name) - Send.

**Send
History**

You can check the status of the photo sending task and perform some quick operations in the sending history section.

Delete 🗑️ : Delete local historical data (does not delete frame photos).

Resend ↶ : You can resend this photo to another frame.

Withdrawal 📄 : Delete local historical data and photos on the frame. As long as the historical records on the app exist and the frame is online, the photo can be withdrawn.
Clear: Clear historical data (tasks in the sending state will not be deleted).

7 Warranty, Compliance, Technical Support, and Safety Information

7.1 Important safety precautions

be careful:

Please do not disassemble this product; There are no user repairable parts inside. Please consult qualified maintenance personnel for relevant maintenance matters. Do not expose this product to liquids, moisture, or extreme temperature environments. Controlling, adjusting or operating according to the specifications clearly stated here may result in electric shock and/or electric shock or mechanical injury. If the LCD screen is broken, please do not touch the glass or liquid and contact Rovesky customer support.

Using accessories other than those recommended by Rovesky may result in fire, electric shock, or injury.

Only use the AC transformer that comes with the photo frame. Using other AC transformers may damage the photo frame and void your warranty.

Do not place the photo frame near open flames, such as lit candles or heaters.

7.2 Other maintenance and upkeep

Please disconnect the power before cleaning. Please do not use water, cleaning agents, or other adhesives on the photo frame or any part of it. Gently wipe the photo frame and screen with a clean, lint free dry cloth. Wipe the fingerprints on the photo frame with a little force.

Service agreements are available in certain countries (regions). For detailed information, please contact the distributor of Rovesky products. For information on the disposal or recycling of digital photo frames, please contact the relevant local authorities.

Rovesky promises to provide free repair services for material and process faults and defects in electronic products and accessories (hereinafter referred to as "products") within one year from the date of purchase. Please leave the original invoice with the date indicated. For any warranty claim during the warranty period, a purchase voucher with a specified date will be required.

7.3 Limited Warranty Scope

The warranty service is only valid within the country (region) where the product was originally purchased. You may need to bear the cost of sending the product to an authorized technical service agency in the country(region) where the product was originally purchased. If the product cannot function properly due to any circumstances and/or limitations described herein during the warranty period, Rovesky will provide repair or replacement services. The warranty service will include all manual services as well as any necessary adjustments/parts replacements. If Rovesky is unable to repair or replace the product, Rovesky will decide to refund the price paid at the time of purchase, provided that the user returns the product to Rovesky along with a purchase certificate that can prove the product price. Repair, replacement, or refund based on the selling price is the only remedy provided by this warranty. If replacement parts are used during the repair process, those parts may be remanufactured or may include remanufactured materials. If it is necessary to replace the entire product, the substitute may be a remanufactured product. Remanufactured products, parts, and materials still apply the remaining warranty period of the original product, or 90 days from the date of self repair or replacement, whichever is longer as the warranty period.

7.4 Limitations

This warranty does not cover any situations beyond Rovesky's control. This warranty does not apply to damages, accidents, changes, modifications, unauthorized repairs, misuse, abuse, use of incompatible accessories or attachments (such as third-party ink or cartridges), failure to follow Rovesky's operating, maintenance, or repackaging instructions, failure to use Rovesky's accompanying items (such as transformers and cables), and claims after the warranty period. Rovesky makes no other express or implied warranties or guarantees with respect to this product, and denies any implied warranties or guarantees of merchantability or fitness for a particular purpose. According to local laws Within the scope of the license, Rovesky's warranty period for the product is one year or equivalent period as required by law from the date of purchase. Providing repairs, replacements, and refunds is Rovesky's sole obligation. Rovesky is not responsible for any direct, indirect, or accidental damage caused by the sale, purchase, or use of this product, regardless of the reason. Rovesky hereby expressly disclaims any liability for any direct, indirect, or accidental losses

(including but not limited to loss of income or profits; loss of work; loss of equipment use; replacement of equipment, facilities, or service fees; or claims from your customers for damage caused by purchase, use, or product failure), or any joint liability resulting from a breach of written or implied warranty, for any reason.

7.5 Your Rights

Some countries (regions) or jurisdictions do not allow exceptions or limitations for accidental or indirect damage, so the above limitations or exceptions may not apply to you. Some countries (regions) or jurisdictions do not allow limitations on the implied warranty period, so the above limitations may not apply to you. This warranty grants you specific rights, but due to differences in country (region) or jurisdiction, you may also have other rights.

Countries (regions) outside of the United States and Canada
The terms and conditions of this warranty may vary outside of the United States and Canada. Unless Rovesky Company communicates Rovesky's special warranty to the purchaser in writing, the warranty or liability will exceed any minimum requirements set by law, even if the defect, damage, or loss is caused by negligence or other actions.

7.6 License

The provision of this product does not imply the transfer of license, nor does it imply the right to distribute the content produced using this product to for-profit broadcasting systems (terrestrial, satellite, cable and/or other distribution channels), streaming media applications (through the Internet, intranet and/or other networks), other content distribution systems (applications such as pay audio or audio on demand) or physical media

On quality (CDs, DVDs, semiconductor chips, hard drives, memory cards, etc.). To achieve the above purposes, a separate license is required.

7.7 FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including

interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
