

Letter of Authorization

Company: Boston Brace International, Inc dba Boston Orthotics & Prosthetics

Address: 37 Shuman Ave, Stoughton, MA 02072

Product Name: OPSB Sensor

Model Number(s): SENSOR-V1

Product Description:

The Brace Sensor System is intended to collect and transmit temperature data to monitor a patient's wear pattern. The system consists of software applications, cloud-based portal, as well as a sensor, which is a wireless accessory used with a medical device to measure, collect, and transmit measured (temperature) data of the device. Clinical teams and users monitor data to understand the patient's wear pattern. The sensor communicates, via Bluetooth, to an OrthoPediatrics Specialty Bracing (OPSB) App available for Android and iOS platforms. Each sensor has a unique QR code that allows synchronization to a smart phone for data security. Synchronized data is automatically uploaded to OPSB cloud platform for analysis and display to the smart phone as a visual reward using stars and trophies for reaching wear goals. Cloud stored data allows members of the clinical team, via a secure log in, to monitor the patient wear patterns remotely.

We authorize MiCOM Labs Inc., 575 Boulder Court, Pleasanton, California 94566, USA, to act on our behalf on all matters concerning the certification of above named equipment.

We declare that MiCOM Labs Inc. is allowed to forward all information related to the approval and certification of equipment to the regulatory agencies as required and to discuss any issues concerning the approval application. Any and all acts carried out by MiCOM Labs on our behalf shall have the same effect as acts of our own.
