CONNECT THE DEVICE

1. Download the free "Sleek Smart Solution" app from the App Store (for iPhone), Google Play Store (for Android Phones), or Scan the QR code below and install it.

2. Make sure your mobile device is connected to your 2.4GHz WiFi network. Tap Log in with Password > Register in the top right corner of the page to go to the Register page.

3. Plug the smart Power Strip into a wall outlet.

Note: Plug the Smart Power strip into the wall. Make sure the indicator light on the device is flashing rapidly blue, indicating the device is ready to connect.

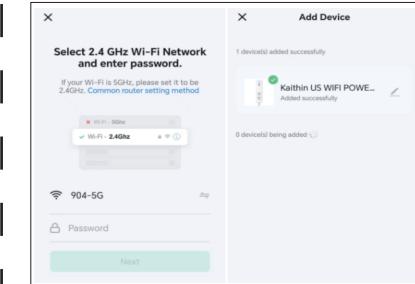

LED Behavior	Device Status
Flashing Rapidly	EZ Pairing
Flashing Slowly	AP Pairing

Button Operation	
Single Click	On/Off
Hold for 5 Seconds	Enter/Cycle through Pairing Modes

4. Add a Device: Make sure your **Bluetooth** is enabled. After logging in, click "+" on the top right of the screen and select "Add Device". Add devices automatically, manually, or by scanning a QR code.

- The app will detect the BLE+WiFi enabled device and ask you if you want to add it.
- Make sure the check is marked next to the device you want to add, click the "+" button Make sure your 2.4GHz network is selected, input the password and press confirm.
- The smart Power Strip will now be connected to the network. Confirm the settings for your device and then Click "Done".

Note: *If the connection fails, try to connect using AP Mode.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
