

# LED candle instruction manual

## DO NOT TOUCH OR MOVE THE FLAME ELEMENT IN ANY WAY

### AUTOMATIC TIMER with REMOTE

Your candle has an on/off switch, but can be set to either a 4, 6 or 8 hour timer with the remote control. To use the remote, turn the power switch to the ON position on the candle.

- When the candle is ON, press 4H, 6H or 8H to set the candle “burning” time.
- Once the timer is set, the flickering candle will be ON for 4, 6 or 8 hours and will remain OFF for 20, 18 or 16 hours, turning back ON automatically at the same time the following day.
- To adjust the mode of candle light, press “Candle” to get flickering light or “Light” to get steady light
- To adjust the brightness of the candle use the two dimmer buttons to adjust for brighter or dimmer candle light.

Your flameless candle should not be exposed to extreme heat, cold, rain or snow and is **intended for indoor use only**. The flickering candle is made of real wax and should not be placed near a heat source such as a radiator, stove, fireplace, etc. – the extreme heat may melt the candle’s wax.

## Remind

### FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**WARNING:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or change to this equipment. Such modifications or change could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

**RF Exposure Statement**

The distance between user and products should be no less than 20cm.
