

Manual

Important Notice

- This light is not fully waterproof. Please remove the light before cleaning your Cup/Tumbler
 - Using this light for the first time, it is recommended to fully charge it first
 - A phone APP can simultaneously link multiple lights for control. When you and your family or friends have installed this light on their cups, please connect your own lights Equipment number accurately
- Notice before use

This light can be controlled and Change the lighting mode by ON/OFF buttons Or a App on mobile phone. When you press and hold the ON/OFF for one second, the light will turn on and the wireless control function will also be activated

When you turn off the light by pressing ON/OFF Button or OFF on app, wireless control will be disabled. You must turn on the light through the ON/OFF button and then the App Wireless control is Usable

Why can't you use the app to turn on the lights when they are turned off?

----- Because when the light is turned off, we must ensure that all power consuming components stop working, including the wireless connection system inside the light. This ensures that the battery has enough power to support your next use!

Installation instructions

① Put the light around the cup

② Twist the screw inward to fix it

③ Installation completed

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
