**FCC Class II Permissive Change for BE200NGW, FCC ID: 2BNM5-BE200NG**

Oscium LLC wishes to have a Class II Permissive Change for BE200NGW module, FCC ID: 2BNM5-BE200NG to allow operation as a hand-held WiFi-survey tool.

Dedicated Firmware and Software has been loaded onto the device to provide this WiFi-survey mode of operation without making any changes to the hardware.

To support the application we present:

- Test report for RSE testing of the module installed in a the new enclosure and connected to a representative mobile phone.
- SAR exemption calculation for survey operation.
- Confirmation in the Operational Description that the module does not transmit in 6 GHz WiFi bands in this application as this is disabled in the Firmware and Software.

Please note the FCC 15B compliance is being dealt with via SDoC and is outside the scope of this certification application.

Please do not hesitate to contact me should you have any questions.

Yours Faithfully

Charlie Blackham
