## Safety Precautions

- Do not use while bathing, showering or sleeping.
- Do not rinse or immerse the device in water.
- Do not wash, sterilize, heat the device, tubing and charging cord.
- After sterilizing, ensure the parts have 20 mins cooling before use. Otherwise that may result permanent damage.
- Ensure the tubing has not kink before or during use.
- Do not place the device near bathtub, hand sink that has risk of falling in water.
- Keep the device away from fire and high temperature environment. Ensure kids and babies can not touch it.
- Fully recharge the device, sterilize and dry the parts before the first use.
- Set the mode and strength level according to your feeling and milk flowing. New moms set the suction from weak to strong gradually.

### Kind Reminder:

- The device is designed to help moms pump milk out but not produce milk .
- If your breast has no milk or has mammary gland blockage, Please consult your doctor before using a breast pump.

## Lithium Battery Caution

- Lithium battery built in, do not dismantle, strike or put in fire.
- Keep it away from water, fire and high temperature environment.
- Stop using when the battery is swollen.
- Do not replace the battery by yourself in case of damage, fire or personal injury.
- Dispose the battery base on your local environmental protection law and regulation.

### Charging:

- Use the original adapter (5V,2A) and charging cord to charge the device.
- Incompatible adapter may cause irreversible damage on the device.
- There should be people present when charging the device, and unplug it in time when fully charged.
- Recharging the device 1 time per month at least to keep the battery active when leave the device unused for long time.

## APP Download & Install & Operation

### • 1.APP Download

PLEASE DOWNLOAD  
SMART LIFE APP

Scan this QR code to download APP from browser or Google Play.

### • 2.APP Connection

①

②

1. Enable bluetooth and location on your phone.
2. Allow the access permissions to Smart Life APP.

3. Click the + and then Add Device.
4. Turn on your breast pump, then APP will scan to find the device automatically.
5. Find and connect with the device successfully.

#### Matters need attention

1. The pump is turn on.
2. Your phone has enabled bluetooth and location .
3. Your phone has allowed the access permissions bluetooth and location for the Smart Life APP.
4. If still can not scan to find the device on APP, please restart your phone and the breast pump. Or contact with Bellababy Service Team for assistance.

### 3. How to remove the device from APP

Method 1: Tap and access All Devices, find the breast pump icon, press and hold for seconds, then click the Remove Device.

⌘⌘⌘ : Heat setting, pull the button to ⌘⌘⌘ to set the heating level.

## Single Side/Double Side Use

Connect to the side with button as a single pump

Single Mode: Support the side with power button for single only, and unplug the tubing on another side.

Double mode: Plug tubing on two sides, device detect it to double mode automatically.

## The Parts

Part No.	Part Name	Material	Quantity
1	Tubing	Solid Silicone	2
2	Membrane	Liquid Silicone	2
3	Membrane lid	PP	2
4	Ring on membrane lid	Solid Silicone	4
5	Cup	PP	2
6	Connector	PP	2
7	Duckbill valve	Liquid Silicone	4
8	Flange pad	Liquid Silicone	2
9	Motor	ABS+Silicone	1
10	Adapter	—	1
11	Charging Cable	—	1

### Note:

- Tubing can be cut to the suitable length by yourself.
- Tubing, Membrane, Duckbill valve and Flange pad are consumable parts.
- Please replace them regularly, usually replace once per 1-3 month base on use frequency.
- These parts can be purchased on [www.amazon.com/bellababy](http://www.amazon.com/bellababy) or your local Bellababy Amazon store.

## How to assemble

• Matters need attention during assembling

- 1.set the valve.
- 2.set the membrane.
- 3.set the connector in the cup.

- 4.set the flange pad attached around the cup.
- 5.set the membrane lid.

- 1.The ears on the connector should be put in the grooves inside the cup.
- 2.The cut on the flange pad should point to the cup opening which is for pouring milk.
- 3.The cup opening.
- 4.set the flange pad attached around the cup firmly, no gap.

• How to pour milk out

- 1.Remove the membrane lid first.
- 2.Pour milk into bottle or storage bag.

## Cleaning & Maintaining

# Product Parameters

Model	BLA8043/BLA8036
Item name	Intelligent electric breast pump
Cup capacity	180ml
Input	5V,2A
Battery capacity	3000mAh,11.1wh
Battery voltage	3.7V
Suction range	30~300 mmHg

## Symbols & Meanings

**SN** Product serial number(The first 5 digits are the year and month, and the last 6 digits are the serial number.)

 Manufacturer name and address

 Please refer to the instruction manual

 Waste electrical materials should be sent to a dedicated collection point for recycling

**IP22** The level of dust and water repellency

 Applied parts: Type BF

 DC symbol

# Warranty

Part No.	Part Name	Warranty
1	Tubing	1 month
2	Membrane	NA
3	Membrane lid	3 month
4	Ring on membrane lid	NA
5	Cup	3 month
6	Connector	3 month
7	Duckbill valve	NA
8	Flange pad	1 month
9	Motor	1 Year

### FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
