01. Packing List

Printer*1 Charging Line*1 Product instruction*1

02. Product Specifications

Product name	Label printer
Product model	SK20
Supported consumables	Thermal receipt paper, sticker paper
Print speed	30mm/s
Printing density	Switchable level 1-5
Printing resolution	203dpi
Print head service life	50KM
Communication interface	Wireless
Product size	97.5*83*54mm (3.84*3.27*2.13inch)
Power input	5V=1A
Power supply method	Lithium battery
Supported operating system	Android
iOS	
Instruction set	ESC/POS
Bar code	1D bar code & 2D bar code
Operating temperature	5°C~50°C
Storage temperature	-20°C~60°C
operating humidity	35%~85%(Non condensation)
Storage humidity	10%~90%(Non condensation)

03. Product Appearance Introduction

Diagram	Button	Operating	Features
	Set button	Press and hold for 3 seconds	Power on/off
	Reset button	Power on and click	Print self-test page
	Reset button	Power on and double click	Print self-test page
	Reset button	Power on and double click	Restart

04. Component description

Options	Parameters
Print Darkness	1(Weakest), 2(Weak), 3(Normal), 4(Dark), 5(Darkest)
Print Quality	1(Low), 2(Medium), 3(High)

Led hint	State
Normal state	White light always on
No paper or TPH overheat	Red light always on
Bluetooth Connected	Blue light always on
Low Battery	Red light flashing

09. FCC Caution

Information to User
1. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Retain or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
2. Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.
