Product name

Zliide Smart-Tag

Model no.

ZL-SEC-2.0

Zliide®

Zliide is a trademark of Zliide Technologies Aps

Description

The Zliide Smart-Tag is an innovative device designed to enhance retail security. The tag automatically unlocks when a customer completes a payment through the Zliide app, allowing for easy removal after purchase.

The device complements Zliide's Assisted Checkout feature by providing an efficient solution that reduces theft and improves the overall shopping experience.

Key features

Automatic unlocking

Tags unlock automatically after payment through the app, enabling effortless removal.

Bluetooth connectivity

Bluetooth technology ensures fast communication between tags and customer devices.

Pin functionality

Tags utilize a pin attachment method, ensuring secure fastening to garments.

Activation button

Tags have a button that customers press to emit product information via Bluetooth to their phones while using the Zliide app.

Adaptable to security infrastructure

Available in Acousto-Magnetic (AM) and Radio Frequency (RF) versions.

Operational workflow

Tag attachment

Retailers attach the smart tags to garments using a secure pin attachment method. Store staff utilize our partner app to streamline the attachment process, ensuring accurate placement and secure fastening of the tags.

Customer interaction

Customers press the button on the tag to emit product information via Bluetooth to their phones while using the Zliide app.

Tag removal

After payment confirmation, the tag automatically unlocks, allowing customers to easily remove it from the garment without assistance.

Tag collection

Customers drop the used tags into a designated collection box. Staff then collect these tags and reattach them to new stock for reuse.

Payment process

Once a customer decides to purchase an item, they complete the payment through the Zliide app, triggering the automatic unlocking of the tag.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
