

FCC Test setup photographs

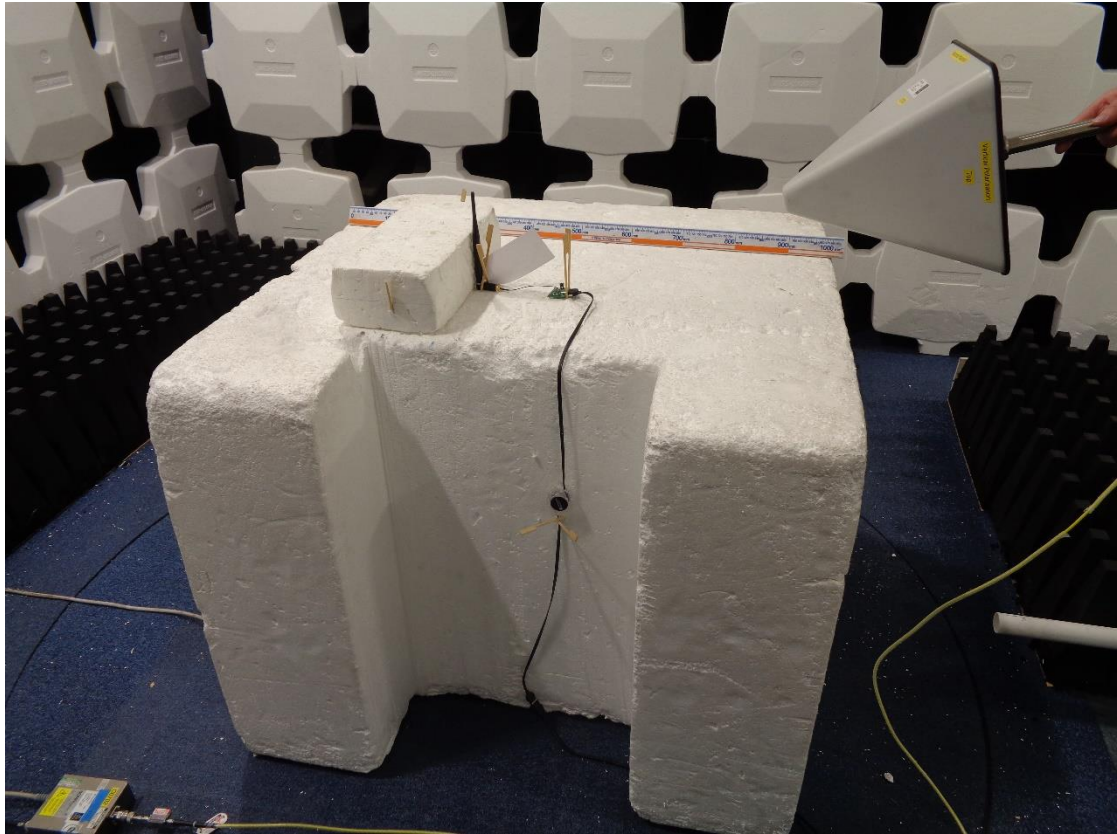

Arrangements for conducted tests – antenna port (Output power, conducted spurious, occupied bandwidth etc.)

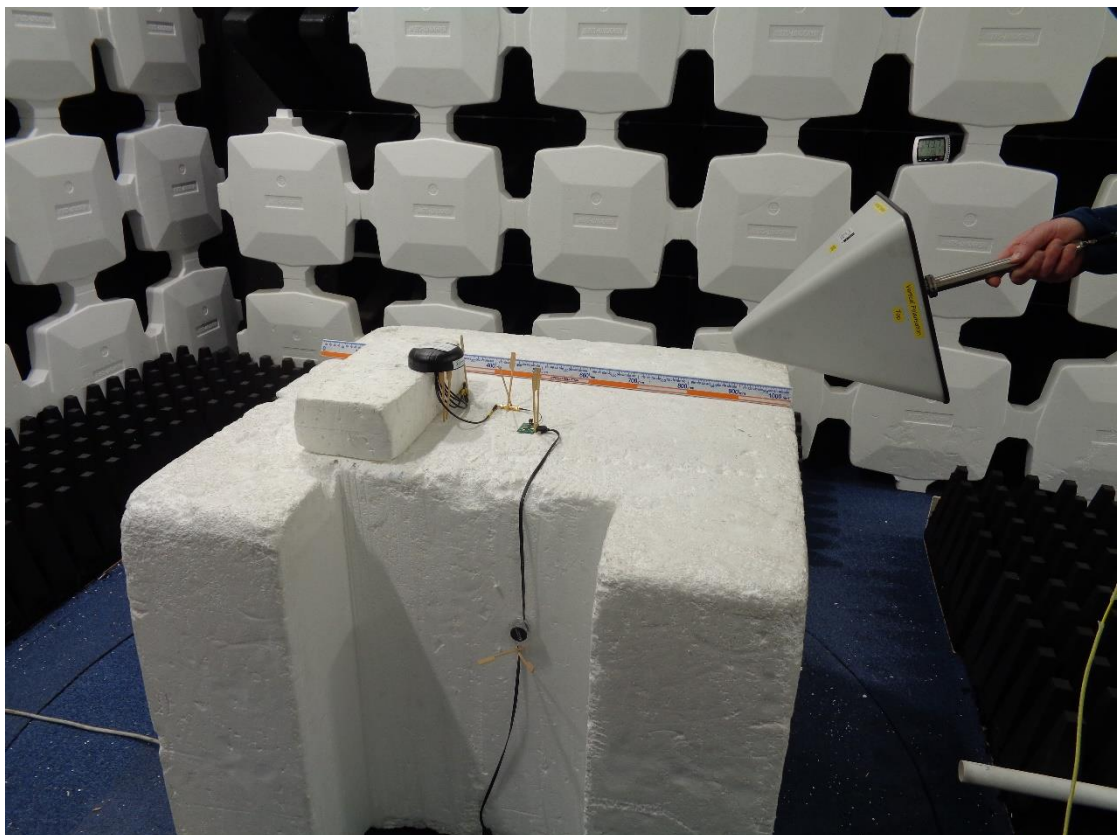

Radiated tests 30MHz to 1GHz – Whip antenna

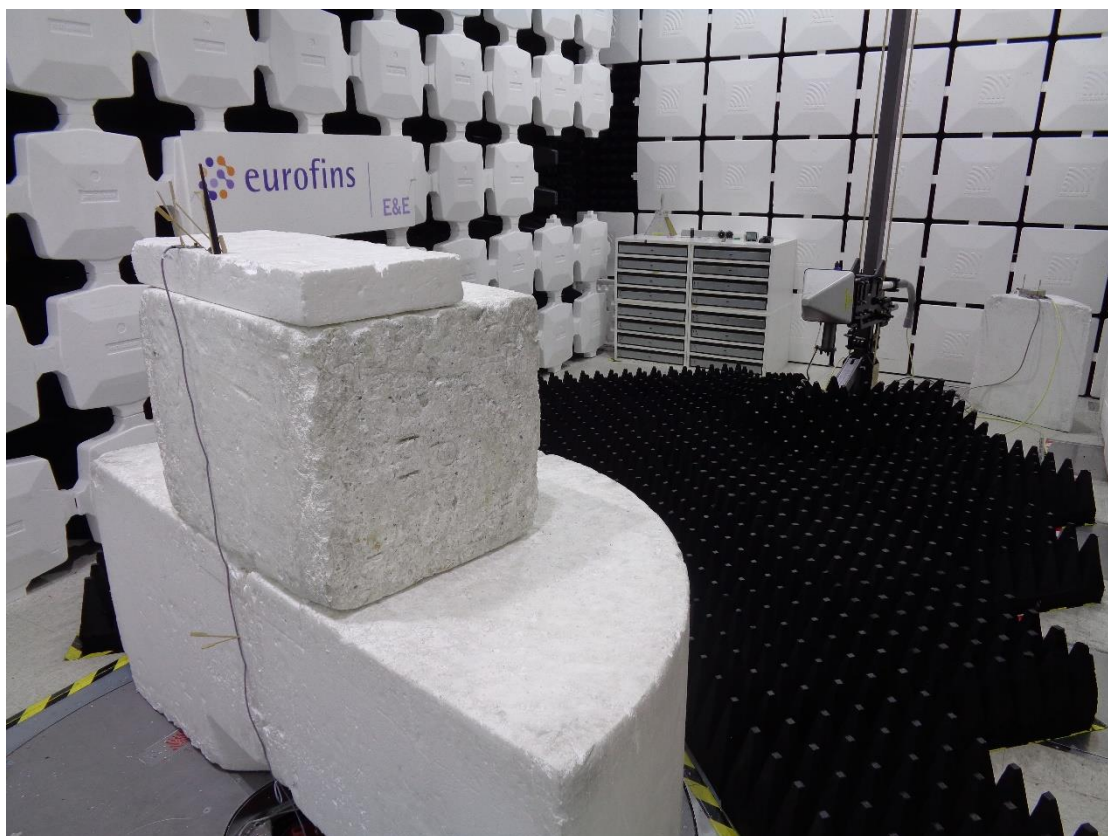

Radiated tests 30MHz to 1GHz – Puck antenna

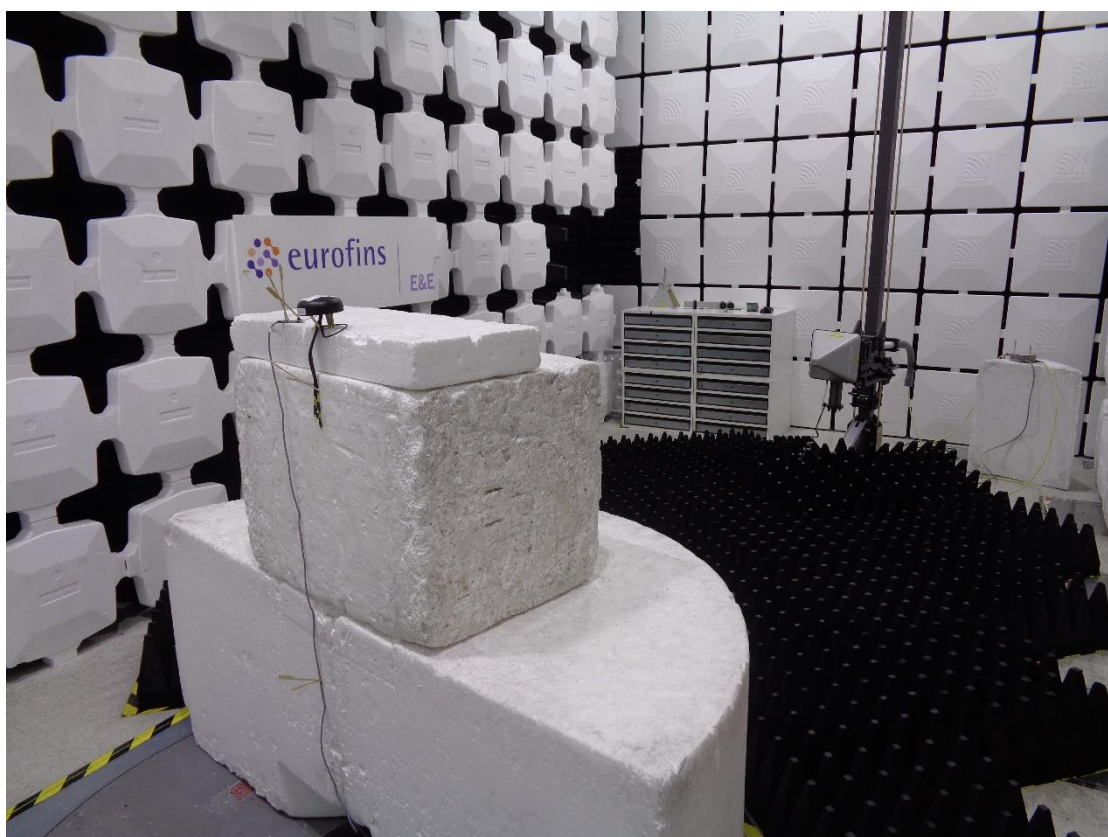

Investigative measurements 1-18GHz – Whip antenna

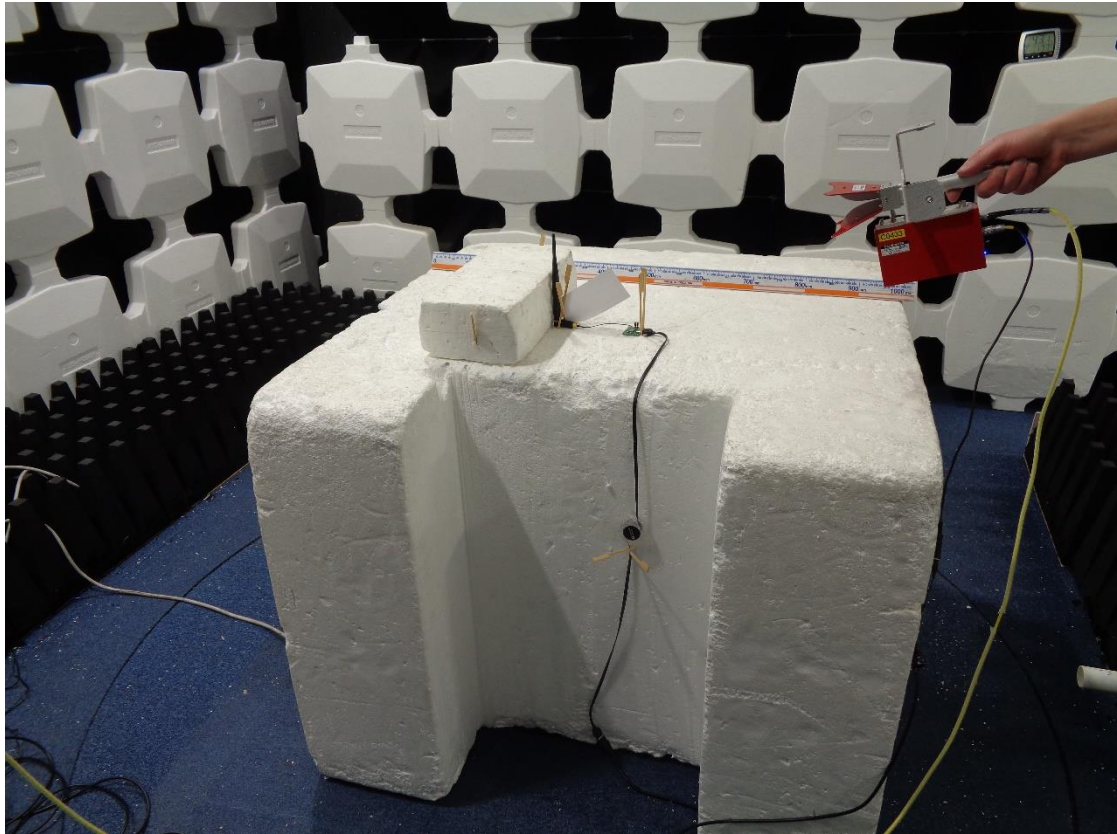

Investigative measurements 1-18GHz – Puck antenna

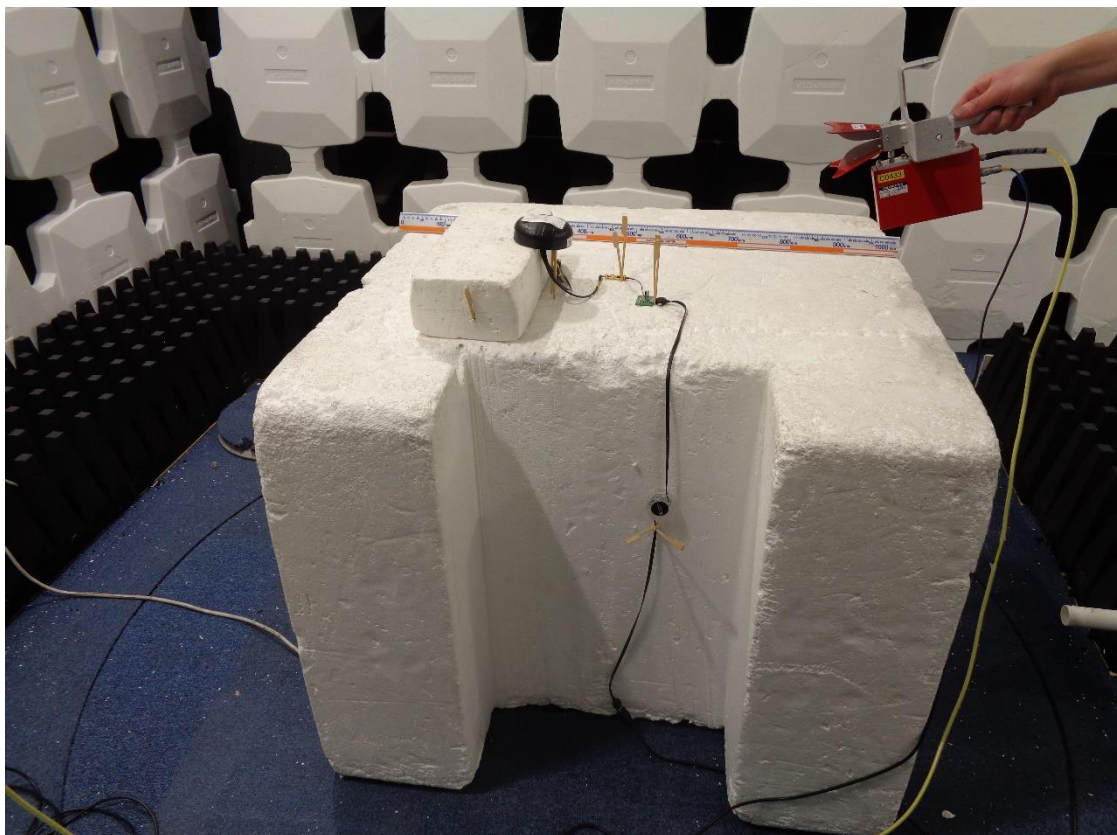

Radiated emissions 1-18GHz 3m distance – Whip antenna

Radiated emissions 1-18GHz 3m distance – Puck antenna

Investigative measurements 18-26GHz – Whip antenna

Investigative measurements 18-26GHz – Puck antenna
