Their electrical circuit design, layout, components used and internal wiring are identical, Different models position different car models for vehicle fault diagnosis, and their respective APP software is different. Our five products—DeepScan, DeepScan Lite, DeepScan Pro, DeepScan Master, and DeepScan Max—utilize the same application for vehicle fault diagnostics. The primary differences among them involve optimizations

tailored to various vehicle types to meet diverse user needs. Specifically, DeepScan Lite is designed for entry-level models, DeepScan Pro is optimized for high-end vehicles, while DeepScan Master and DeepScan Max are customized for specific brands and advanced functionalities. Hardware configurations and feature sets remain consistent across all models. These distinctions do not affect the overall consistency and compatibility of the products.

5.1 Antenna Requirement

Standard requirement:	47 CFR Part 15C Section 15.203 /247(c)
15.203 requirement: An intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator, the manufacturer may design the unit so that a broken antenna can be replaced by the user, but the use of a standard antenna jack or electrical connector is prohibited. 15.247(b) (4) requirement: The conducted output power limit specified in paragraph (b) of this section is based on the use of antennas with directional gains that do not exceed 6 dBi. Except as shown in paragraph (c) of this section, if transmitting antennas of directional gain greater than 6 dBi are used, the conducted output power from the intentional radiator shall be reduced below the stated values in paragraphs (b)(1), (b)(2), and (b)(3) of this section, as appropriate, by the amount in dB that the directional gain of the antenna exceeds 6 dBi.	
EUT Antenna:	
The antenna is PCB antenna. The connection/connection type between the antenna to the EUT's antenna port is: permanently attachment. This is either permanently attachment or a unique coupling that satisfies the requirement.
