Pyeongtaek-si, Gyeonggi-do 17709,  
South Korea

**Date:** September 2, 2025

**Subject:** WLAN 6 GHz Attestation Letter for Indoor Client 6XD

**FCC ID:** 2BO3LLGSWNAX61

We, **LG Electronic Inc.**, attest that this device under FCC ID: 2BO3LLGSWNAX61 complies with device protocol requirements and operational restrictions: for indoor client 6XD.

1) Indoor Client (6XD)

- a. As demonstrated in the test report, Contention-Based Protocol is permanently embedded in the module and is not host-dependent.
- b. The device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- c. This device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that they will not continually repeat the request if they do not receive a response from an AP.
- d. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.
- e. Control of or communications with unmanned aircraft systems is prohibited, including drones.

Should you have any questions or comments concerning the above, please contact the undersigned.
