3D Technologies Ltd (Trading as Moasure) ("the applicant") certifies that the Moasure 2 and Moasure 2PRO products vary only in the number of motion sensor components assembled to the PCB during production. There are no variations in the production of the two SKU's that affect the Bluetooth RF performance of the devices. This has been tested and confirmed by our test house, TÜV SÜD, with the test units of both SKU's, supplied to them.

Sincerely,
Arthur Mitchell (Head of Engineering)
