Connection between watch and mobile phone

Download the APP " Fere Fit" to your mobile phone and install

it

1. iOS/Android mobile phone users

Scan the QR code below through your mobile browser, or scan it with WeChat. After the interface opens, select Android/iOS in the interface and open the download using your mobile browser.

The QR code below is for downloading the Fere Fit APP

Android/iOS

2. On Android phones, search for " Fere Fit" in App Store, Google Play, and various mobile app stores to download it. On Apple phones, search for " Fere Fit" in App Store to download it.

After the download is complete, there will be various permission reminders during the installation process. Click to agree to all of them. The watch and mobile phone must be connected to two Bluetooth: 3.0 and 5.3 to realize all functions.

Bluetooth 5.3 connection method: After the installation is complete, open " Fere Fit" and turn on the Bluetooth of your phone . Fere Fitt will have an activation notification prompt,

click OK. Click More in the lower right corner, enter Scan Device, search for the Bluetooth address and click Connect. Some Android phones need to turn on the phone GPS to search for the watch Bluetooth name.

Bluetooth 3.0 connection method: 1. Turn on the watch 3.0 Bluetooth 2. Turn on the phone Bluetooth and click the name of the watch Bluetooth you want to connect to - connect the Bluetooth device according to the prompts, and the phone will display "Connected".

How to identify a successful Bluetooth connection: Pull up the status bar on the watch in the standby interface . If the Bluetooth icon on Watch 3.0 and 5.3 is blue + green, it means the Bluetooth connection is successful. If the Bluetooth icon is gray, it means the Bluetooth is not connected.

Simple solutions to common problems: Since there is no uniformity in the Bluetooth protocols of different mobile phone brands, the Bluetooth connection between the mobile phone and the watch may be unstable sometimes. You can turn off the Bluetooth of the mobile phone and reconnect it, or restore the watch to factory settings.

How to set up email notifications

Go to Settings on your phone - Application Management, find " Fere Fit" - Permission Management, and enable all permissions. Then go to Notification Management - find " Fere Fit" and enable all permissions.

What should I do if I don't receive notifications?

First of all, the notification function of the watch is just to

synchronize the notification function of the mobile phone, such as incoming calls, letters, QQ and WeChat message reminders. If your mobile phone does not receive the notification, the watch will not receive it. You need to go to the phone settings-notification function, find the corresponding APP, and turn on the notification permission.

Function Introduction

Encoder: Rotate the button on the standby interface to switch the dial, and slide up and down in the secondary menu; the starry sky style menu can be enlarged and reduced, and when the interface is maximized, you can enter the application in the middle of the interface .
