Note: According to ANSI C63.26:2015 section 5.2.5.3: For MIMO mode, Conducted Band Edge and Conducted Spurious Emission are tested on a single output port and then adjusted according to $10 \cdot \lg(N_{\text{ANT}})$ rule. MIMO $2 \times 2 = \text{SISO} + 3.01\text{dB}$. (The worst mode is Ant1, all test results have a margin of at least 3.01dB from the limit values within the corresponding test range, so the test result is pass.)
