⚠ If the battery power is too low, the device cannot be turned on. Please charge it in a timely manner.

Installing the SIM Card

Please use a standard Nano-SIM card and ensure that the metallic chip on the SIM card is clean and free from dirt or oxidation.

When positioning the card, align the notch on the SIM card with the notch in the slot, and then place the SIM card into the slot. Once the card is properly in place, align the hole in the slot with the opening on the watch, and then push the slot back into the watch.

⚠ After the installation of the SIM card, it is necessary to reboot the watch by long-pressing the power key for the watch to recognize the SIM card.

- Switch**: Switch between round and square screens.
- Power Saving Mode Selection**: Switch between various saving modes. One-Key
- Cleanup**: One-click cleanup of background running applications.

Safety and Precautions

1. Wear the watch about a finger's width away from your wrist bone. Wearing it too loosely may affect heart rate and blood oxygen data. When measuring heart rate and blood oxygen on the watch, keep your wrist still during the measurement.
2. The watch has been tested and has demonstrated water and dust resistance under specific conditions. However, it is not a professional waterproof device. The watch can be used during sports (including exposure to sweat), rain, or hand washing.
3. The watch is not resistant to seawater, alkali solvents, chemical reagents, and other corrosive liquids.
4. Use the device within a temperature range of 0°C to 45°C. Operating outside this range may cause device malfunction.
5. Charge the device using the provided charging cable. When using a power adapter for charging, use one rated for 5V output voltage and 1A output current, which meets the required safety standards. Keep the adapter, charging cable, and device dry while charging. Do not touch the adapter and charging cable with wet hands, and ensure they are not exposed to rain or submerged in liquid.

6. The product contains a non-removable lithium battery. Do not replace the battery yourself to avoid damaging the battery or device. Improper battery disposal may lead to explosions.
7. Do not disassemble, impact, squeeze, or throw the device into the fire to avoid explosions. If the battery swells severely, stop using it.
8. Avoid exposing the device to prolonged high temperatures or placing it near heat sources like sunlight, heaters, microwaves, ovens, or water heaters. Overheating of the battery can cause explosions.
9. The device and accessories may contain small parts. Keep them out of reach of children.
10. This device is not a medical device. Any data/information provided by the product should not be used as a basis for diagnosis, treatment, or prevention of diseases.
11. If not using the product for a long time, charge it fully, turn it off, and store in a cool and dry place. Charge it at least once every 3 months.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

NOTE: The product is limited to wrist use. Use a minimum distance and mouth of 10mm.

Product Information

Parameters

Product Name: Smart Watch

Display: 1.95 inch MOLED

Resolution: 720*720 pixels

Input Rating: 5V ---1A

Wireless Connectivity: Bluetooth,Wi-Fi

Battery Capacity: High-Voltage 2100 mAh

Operating Temperature: 0°C~45°C

Ingress Protection Level: IP67

Bluetooth Transmit Power: ≤20dBm(EIRP)
